# 1. INTRODUCTION

This Health and Safety Manual has been prepared by Ellis Whittam on our behalf and with our involvement. It contains our Health and Safety Policy as required by the Health and Safety at Work Act 1974 and it defines the way we manage the health and safety hazards and risks associated with our business, premises and activities.

Westbrook Hay Educational Trust T/A Westbrook Hay Prep School are committed to managing health and safety effectively to protect our employees and other persons with whom we interact because we recognise that we have not only a moral and legal duty but also that our employees are our greatest asset.

Our Health and Safety Policy Statement sets out our commitment and the objectives we aspire to in managing health and safety. It is signed by the most senior person in our organisation to demonstrate that our commitment is led from the top.

Our approach to managing health and safety will be pragmatic and proportionate and will be prioritised according to risk with the objective of maintaining continuous improvement. We accept that we cannot eliminate risk from everything we do but we can manage risk in such a way that exposure to hazards is controlled as far as is reasonably practical.

We recognise that improvement in health and safety will not happen by chance and that planning to manage using a systematic approach through risk assessment is a necessary first step and an ongoing process. In moving forwards we will wherever possible eliminate risk through selection and design of buildings, facilities, equipment and processes. Where risks cannot be eliminated they will be minimised by the use of physical controls or, as a last resort, through systems of work and personal protection.

Our success in managing health and safety will be measurable and we look to establish performance standards against which we can monitor our progress to identify future actions to go into our improvement programme.

Based on our performance measurement in the form of accident monitoring, internal monitoring and external audits we will review our health and safety arrangements periodically and at least annually. The results of our measurement will be recorded and presented to the Board in our Annual Report.

This Policy has been created by the named consultant from Ellis Whittam with the co-operation of our staff. They have signed the Policy to confirm that at the time of creation it is suitable, sufficient and relevant to our circumstances and operations. Our nominated responsible person has signed the Policy to confirm that it is a true reflection of the activities and operations that we undertake and the circumstances in which the school operates.

Creation Date	Signed on behalf of Ellis Whittam	Confirmed
31 <sup>st</sup> October 2019		

**POLICY REVIEW**

This Health and Safety Policy will be reviewed annually by Ellis Whittam Ltd in conjunction with our nominated responsible person.

As each review is completed it will be signed off by the consultant from Ellis Whittam and confirmed by our nominated responsible person.

Review Date	Signed on behalf of Ellis Whittam	Confirmed
December 2020		

**DOCUMENT CONTROL**

The electronic copy of the Health and Safety Policy provided by Ellis Whittam will remain the controlled copy. Where further controlled copies are required then these should be issued accordingly and added to a register of controlled copies. Any amendments made to the policy will be provided for each of the controlled copies to ensure all controlled copies in circulation remain up to date.

If uncontrolled copies of the policy are printed either in whole or part, or if uncontrolled electronic copies are issued, then these will be clearly marked as an 'UNCONTROLLED COPY'.

**Register**

Copy Number or Reference	Location kept

## AMENDMENT RECORD

Any amendments made to the Health and Safety Policy will be recorded below with information on changes made.

Where significant changes are to be made which could impact on the school or our pupils, we will consider the reasons for change, potential problems and how it will be implemented.

Date	Section	Ref /Title	Details of amendment made	Change made by

## LEGISLATION

Extracts of relevant legislation are provided for ease of reference on the Ellis Whittam webpage. Full copies of relevant legislation are available on the Office of Public Sector Information web page ([www.opsi.gov.uk](http://www.opsi.gov.uk)) and the National Archives ([www.legislation.gov.uk](http://www.legislation.gov.uk))

## GUIDANCE

Guidance on a number of health and safety issues can be accessed by logging onto the Ellis Whittam webpage which we hope you will find useful as a quick reference source.

Should you require further advice or assistance not available here then remember that advice on any health and safety issue is available from the **Ellis Whittam** advice line - **Tel: 0345 226 8393**.

## FORMS

Relevant forms and templates that may be utilised can be accessed by logging onto the Ellis Whittam webpage.

# **POLICY STATEMENT**

## **HEALTH AND SAFETY POLICY STATEMENT**

The management of Westbrook Hay Educational Trust t/a Westbrook Hay Prep School recognises that it has a legal duty of care towards protecting the health and safety of its employees, pupils and others who may be affected by the school's activities.

In order to discharge its responsibilities the management of the school will:

- bring this Policy Statement to the attention of all employees
- carry out and regularly review risk assessments to identify proportionate and pragmatic solutions to reducing risk
- communicate and consult with our employees on matters affecting their health and safety
- comply fully with all relevant legal requirements, codes of practice and regulations at International, National and Local levels
- eliminate risks to health and safety, where possible, through selection and design of materials, buildings, facilities, equipment and processes
- encourage staff to identify and report hazards so that we can all contribute towards improving safety
- ensure that emergency procedures are in place at all locations for dealing with health and safety issues
- maintain our premises, provide and maintain safe plant and equipment
- only engage contractors who are able to demonstrate due regard to health & safety matters
- provide adequate resources to control the health and safety risks arising from our work activities
- provide adequate training and ensure that all employees are competent to do their tasks
- provide an organisational structure that defines the responsibilities for health and safety
- provide information, instruction and supervision for employees
- regularly monitor performance and revise policies and procedures to pursue a programme of continuous improvement.

This Health and Safety Policy will be reviewed at least annually and revised as necessary to reflect changes to the school activities and any changes to legislation. Any changes to the Policy will be brought to the attention of all employees.

**Signed: Headmaster: Mark Brain**

**Dated: March 22,2021**

**Signed: Chair of Governors: Andrew Newland**

**Dated: March 22,2021**

**ORGANISATION FOR  
HEALTH & SAFETY**

---

The overall responsibility for health and safety rests at the highest management level. However, it is the responsibility of every employee to co-operate in providing and maintaining a safe place of work.

This part of our policy allocates responsibilities to line managers to provide a clear understanding of individuals' areas of accountability in controlling factors that could lead to ill health, injury or loss. Managers are required to provide clear direction and accept responsibility to create a positive attitude and culture towards health and safety.

The following positions have been identified as having key responsibilities for the implementation of our health and safety arrangements:

**Board of Governors Headmaster Bursar Heads of Department Teachers Pupils Employees Contractors  
Visitors Ellis Whittam Health and Safety Committee**

# **HEALTH AND SAFETY RESPONSIBILITIES**

---

## **Board of Governors**

The Board of Governors, comprising of the Headmaster and the school governors have a strategic role in the running of the school including the management of health and safety.

The Board of Governors will ensure that:

- they provide a lead in developing a positive Health and Safety culture throughout the school
- any decisions reflect its Health and Safety intentions
- adequate resources are available for the implementation of Health and Safety
- an effective management structure for the implementation of Health and Safety is established
- they will promote the active participation of employees in improving Health and Safety performance
- they review the Health and Safety performance of the school annually and plan safety improvements for the following year
- health and safety objectives are set across the whole school and for each department
- standards of health and safety are set across all areas
- a health and safety plan of continuous improvement is created and monitored for progress against agreed targets
- a risk management programme is developed and implemented across the school
- senior management are competent to fulfil their health and safety responsibilities and that effective training programmes have been put in to place
- a system of communication and consultation with employees is established via the Health and Safety Committee
- matters raised by the Health and Safety Committee are considered for action
- monitoring systems are in place to monitor the effectiveness of the schools risk control
- health and safety policies and procedures are reviewed in light of the results of internal and external audits
- actions required by enforcing authorities are programmed and included within health and safety plans to ensure legal compliance.

## **Headmaster**

The Headmaster has overall responsibility for ensuring compliance with Health and Safety legislation in the day to day running of the school but delegates the responsibility for implementation to the Bursar.

The Headmaster will ensure that:

- our Health and Safety Policy is implemented, monitored, developed, communicated effectively, reviewed and amended as required
- suitable and sufficient funds, people, materials and equipment are provided to meet all health and safety requirements
- senior management designated with health and safety responsibilities are provided with support to enable health and safety objectives to be met
- a positive health and safety culture is promoted and that senior management develop a pro-active safety culture which will permeate into all activities undertaken and reach all personnel
- a system of communication and consultation with employees is established
- effective training programmes have been put in to place

## **Bursar**

The Bursar as the person with special responsibility for health and safety will ensure that:

- the Board of Governors, the Headmaster and the Health and Safety Committee are advised of relevant changes in health and safety legislation, codes of practice and Department for Education standards
- risk assessment requirements are co-ordinated and the implementation of any action required is monitored
- risk assessments are reviewed regularly and any changes are brought to the attention of staff who may be affected
- regular Health and Safety Committee meetings are held where health and safety issues can be raised and discussed
- they provide advice on health and safety training requirements
- details of accidents, dangerous occurrences or diseases that are notifiable are reported to the Enforcing Authorities
- they assist Heads of Department in investigating and recording accident investigations
- contact with external organisations such as the emergency services is co-ordinated
- health assessment requirements are identified and advised to management
  - the schedule of statutory examinations of plant, equipment and vehicles is maintained and Heads of Department are made aware of impending examinations
- premises, plant, equipment and school vehicles are maintained in a safe condition
- adequate arrangements are in place to ensure the security of the school, the staff, visitors and pupils
- adequate arrangements for fire and first aid are established
- welfare facilities provided are maintained in a satisfactory state
- contractors engaged are reputable, can demonstrate a good health and safety record and are made aware of relevant local health and safety rules and procedures.

health and safety notices are displayed

they actively lead the implementation of our Health and Safety Policy

- they supervise their staff to ensure that they work safely
- safe systems of work are developed and implemented

- risk assessments are completed, recorded and regularly reviewed
- accidents, ill health and 'near miss' incidents at work are investigated, recorded and reported
- they communicate and consult with staff on health and safety issues
- they encourage staff to report hazards and raise health and safety concerns
- safety training for staff is identified, undertaken and recorded to ensure staff are competent to carry out their work in a safe manner
- issues concerning safety raised by anyone are thoroughly investigated and, when necessary, further effective controls implemented
- personal protective equipment is provided, staff instructed in its use and that records are kept
- hazardous substances are stored, transported, handled and used in a safe manner according to manufacturers' instructions and established rules and procedures
- agreed safety standards are maintained particularly those relating to housekeeping
- health and safety rules are followed by all.
- an annual report on the safety performance of the school is presented to the Estates and Facilities Committee.
- a health and safety action plan of continuous improvement is created as part of the general risk assessment and the Estates and Facilities Committee is informed of progress.

## **Heads of Department (Head of Year, Head of Subject and Assistant heads)**

Heads of Department will ensure that in their areas of control:

- they actively lead the implementation of the Health and Safety Policy
- they supervise their staff to ensure that they work safely
- the completion of written risk assessments of teaching practices and activities including equipment and substances; that any general advice on safety matters given by the DfE, Local Authority and other relevant bodies in relation to the school are implemented, that this is then translated into written safe methods of working practice
- safe methods of work are implemented
- inform pupils, staff and visitors as to their own personal safety and makes sure they are aware of the health and safety procedures in place
- risk assessments are regularly reviewed
- accidents, ill health and 'near miss' incidents at work are recorded, investigated and reported to the Bursar
- they communicate and consult with staff on health and safety issues
- they encourage staff to report hazards and raise health and safety concerns
- safety training for staff is identified, undertaken and recorded to ensure staff are competent to carry out their work in a safe manner
- issues raised by anyone concerning safety are thoroughly investigated and, when necessary, further effective controls implemented
- equipment is maintained in a safe condition
- statutory examinations are planned, completed and recorded
- personal protective equipment is provided and worn by staff and pupils, and that staff and pupils are instructed in its use
- any safety issues that cannot be dealt with are referred to the Bursar for action
- hazardous substances are stored, transported, handled and used in a safe manner according to manufacturers' instructions and established rules and procedures
- agreed safety standards are maintained, particularly those relating to housekeeping

- all relevant safety documents including DfE Guides, etc. are maintained and made available to all employees
- health and safety rules are followed by staff and pupils
- they perform regular health and safety inspections within their department as required by the Headmaster.

## Teachers

Teachers will ensure that in their areas of responsibility:

- they actively lead the implementation of the Health and Safety Policy
- they supervise their staff and pupils to ensure that their lessons and activities are carried out safely
- safe teaching practices are developed and implemented
- risk assessments are completed, recorded and regularly reviewed
- accidents, ill health and 'near miss' incidents at work are investigated, recorded and reported to the Bursar
- they communicate and consult with staff on health and safety issues
- they encourage staff and pupils to report hazards and raise health and safety concerns
- safety training for staff is identified, undertaken and recorded to ensure staff are competent to carry out their work in a safe manner
- issues raised by anyone concerning safety are thoroughly investigated and, when necessary, further effective controls implemented
- equipment is maintained in a safe condition
- personal protective equipment where required is provided and that staff and pupils are instructed in its use
- any safety issues that cannot be dealt with are referred to the Bursar for action
- hazardous substances are stored, transported, handled and used in a safe manner according to manufacturers' instructions and established rules and procedures
- agreed safety standards are maintained, particularly those relating to housekeeping
- all relevant safety documents including CLEAPSS, DfES Guides, etc. are maintained and made available to all employees
- health and safety rules are followed by all staff and pupils.

## **Pupils**

All pupils will be instructed to:

- co-operate with Teachers and school staff on health and safety matters
- not interfere with anything provided to safeguard their own health and safety or the safety of others
- take reasonable care of their own health and safety; and report all health and safety concerns to a Teacher.

## **Employees**

All employees must:

- take reasonable care of their own safety
- take reasonable care of the safety of others affected by their actions
- observe the safety rules
- comply with the Health and Safety Policy
- conform to all written or verbal instructions given to them to ensure their personal safety and the safety of others
- dress sensibly and safely for their particular working environment or occupation
- conduct themselves in an orderly manner in the work place and refrain from any antics or pranks
- use all equipment, safety equipment, devices and protective clothing as directed
- avoid any improvisations of any form which could create an unnecessary risk to their personal safety and the safety of others
- maintain all equipment in good condition and report defects to their line manager
- report any safety hazard or malfunction of any item of plant or equipment to their line manager
- report all accidents to their line manager whether an injury is sustained or not
- attend as requested any health and safety training course
- observe all laid down procedures for processes, materials and substances used
- observe the fire evacuation procedure and the position of all fire equipment and fire exit routes.

## **Contractors**

All contractors must:

- take reasonable care of their own safety
- take reasonable care of the safety of pupils, school staff and others affected by their actions
- observe the safety rules of the school
- submit their health and safety policy and relevant risk assessments to the school for approval
- comply with and accept our health and safety policy, if they do not have one
- dress appropriately, sensibly and safely when on school premises and for the task being undertaken
- conduct themselves in an orderly manner in the work place and refrain from any antics or pranks
- use all equipment, safety equipment, devices and protective clothing as required by the school and as indicated in the risk assessment for the task
- avoid any improvisations of any form which could create an unnecessary risk to their personal safety and the safety of others
- maintain all equipment in good condition, not use any defective equipment and ensure that any portable electrical equipment bears a current test certificate
- report any safety hazard or malfunction of any item of plant or equipment to their line manager
- report all incidents to their line manager and to the school whether an injury is sustained or not
- ensure that their employees only use equipment for which they have been trained
- attend as requested any health and safety training course
- observe all agreed procedures for processes, materials and substances used
- observe the fire evacuation procedure and the position of all fire equipment and not obstruct fire exit routes or inhibit fire alarm sensors or devices
- provide adequate first aid arrangements unless otherwise agreed with the school.

## **Visitors**

- All visitors are required to sign in at the reception. Visitors will be collected from reception by the member of staff concerned or escorted to the appropriate area of the school.

- Hirers of the school premises must use plant, equipment and substances correctly and use the appropriate safety equipment. They will be made aware of their obligations in relation to health and safety when making the booking.
- With safeguarding being the most important part of our role at Westbrook Hay Prep School, the identification of Staff and Visitors is paramount. Staff and visitors are therefore all issued with lanyards thus making sure all adults are quickly and easily identifiable.
- 
- A colour coded system of lanyards is in place:
- 
- Normal visitor or unchecked volunteer Red printed Visitor
- DBS contractor Grey printed Westbrook Hay
- DBS visitor/volunteer Green printed Visitor
- Governor Black printed Governor
- Anyone not wearing a lanyard must be challenged in a friendly way, as should any visitor wearing a red lanyard who is unaccompanied. There needs to be a culture of security and friendly challenge.

‘Good morning, I am Mark Brain, the Headmaster, I can see that you are a visitor, can I help you?’

- If an intruder is uncooperative about going to the reception or leaving the site, or a member of staff feels threatened, or is threatened with violence or a violent attack takes place, immediate help from the Police should be sought by telephone.

## **Ellis Whittam (Health and Safety Consultants)**

Ellis Whittam, in agreement with management, provides us with the following services:

- A general risk assessment in the first part of the contract that forms the basis of our risk management programme and helps us plan our future actions to reduce risk
- Development of our documentation throughout the period of our contract and keeping it updated for:
  - changes in Health and Safety legislation relevant to us
  - organisational changes which affect our management system
- A consultant visit to train senior managers and to support our implementation of this Policy by:
  - assisting us to complete specific risk assessments
  - providing further training, as agreed, on relevant agreed topics
  - reviewing and auditing our health and safety procedures and legal compliance
  - providing advice on implementing changes and system procedures

Ellis Whittam is also contracted to:

- fulfil the role of 'Competent Person', providing advice and assistance on Health and Safety issues
- provide for us a telephone advisory service - available 24 hours per day, 365 days of the year
- provide crisis help if we have a serious accident or incident involving the Enforcement Authorities
- provide legal fees insurance, the terms of which are defined in our insurance policy document
- provide briefings to help keep us up to date with new and forthcoming legislation.

## **Health and Safety Committee**

The Health and Safety Committee is the consultative body of the school for health and safety.

The Health and Safety Committee will:

- consider and support the school's policies for health, safety and welfare and assist in monitoring and reviewing their effectiveness
- consider forthcoming legislation and assess its implications and where necessary to recommend the establishment of rules or the review of existing procedures of any school activity
- promote health and safety communication and training in the organisation at all levels
- receive detailed reports of investigations into all reportable accidents, dangerous occurrences and cases of reportable diseases to consider the effectiveness of any action taken to prevent future similar accidents
- receive a list of all other recorded accidents or occurrences and to consider the effectiveness of any remedial action taken to prevent future similar incidents
- consider reports of internal and external monitoring of the school
- ensure trends in accident statistics are identified and to make recommendations for action
- keep under review communications and publicity relating to health, safety and welfare and where necessary to recommend any improvements or changes
- consider reports provided by inspectors of the enforcing authority under the Health and Safety at Work Act 1974, or any other relevant enforcement authority
- consider relevant health, safety and welfare matters raised by members of the Health and Safety Committee.

# **HEALTH AND SAFETY RULES**

## 5. HEALTH AND SAFETY RULES

This section of our Health and Safety Policy specifies the rules laid down for the attention of all employees. These rules are prepared in accordance with legal requirements and acknowledged safe working practices. In addition to the legal duty imposed upon employees to comply with these rules, failure to observe them will be considered to be a breach of the contract of employment and will result in disciplinary action being taken.

Employees are reminded that a breach of health and safety legislation by an employee is a criminal offence and action taken by an Enforcing Officer against an individual may result in heavy penalties.

Safety rules may vary depending upon the nature of work and the circumstances therefore the overriding requirement is that employees are expected to act in a sensible manner and adhere to verbal instructions given by Management.

## **General**

- It is the duty of all employees to co-operate with the Board of Governors in fulfilling our legal obligations in relation to health and safety.
- Employees must not intentionally or recklessly interfere with anything provided in the interests of health, safety or welfare.
- Employees are required to notify to management of any unsafe activity, item or situation.

## **Working Practices**

- Employees must not operate any item of plant or equipment unless they have been trained and authorised.
- Employees must make full and proper use of all equipment guarding.
- Employees must not clean any moving item of plant or equipment.
- Employees must not make any repairs or carry out maintenance work of any description unless authorised to do so.
- Employees must use all substances, chemicals, liquids etc, in accordance with all written instructions.
- Employees must not smoke except in prescribed areas.

## **Hazard / Warning Signs and Notices**

- Employees must comply with all hazard/warning signs and notices displayed on the premises.

### **Working Conditions / Environment**

- Employees must make proper use of all equipment and facilities provided to control working conditions/environment.
- Employees must keep stairways, corridors, classrooms and work areas clear and in a clean and tidy condition.
- Employees must dispose of all rubbish, scrap and waste materials using the facilities provided. This includes clearing away unwanted copies at the copier areas, removing remnants of paper from the guillotine areas.
- Employees must clear up any spillage or liquids in the prescribed manner.
- Employees must deposit all waste materials and substances at the correct disposal points and in the prescribed manner. Recyclable items must be disposed of in the correct bins.

### **Protective Clothing and Equipment**

- Employees must use all items of protective clothing/equipment provided as instructed.
- Employees must store and maintain protective clothing/equipment in the approved manner.
- Employees must report any damage, loss, fault or unsuitability of protective clothing/equipment to their line manager.

### **Fire Precautions**

- Employees must comply with all laid down emergency procedures.
- Employees must not obstruct any fire escape route, fire equipment or fire doors at any time.
- Employees must not misuse any fire fighting equipment provided.
- Employees must report any use of fire fighting equipment to their line manager.

## **Accidents**

- Employees must seek medical treatment for work related injuries they receive by contacting a designated first aider. Upon returning from treatment they must report the incident to their line manager.
- Employees must ensure that any accident or injury treatment is properly recorded in the Accident Book.
- Employees must notify management of any incident in which damage is caused to property.

## **Health**

- Employees must report to management any medical condition or medication which could affect the safety of themselves or others.
- Employees must co-operate with the management on the implementation of the medical and occupational health provisions.

## **School Transport**

- Drivers must carry out prescribed checks of vehicles prior to use and in conjunction with the laid down checking procedure.
- Employees must not drive or operate any vehicles for which they do not hold the appropriate driving licence or permit.
- Employees must not carry unauthorised passengers or unauthorised loads.
- Employees must not use vehicles for unauthorised purposes
- Employee must not use vehicles for personal use unless express written permission is granted by the Bursar.
- Employees must not load vehicles above the stated capacity.
- Employees must not drive or operate vehicles whilst suffering from a medical condition or illness that may affect their driving or operating ability.
- Employees must not drive whilst using a mobile phone or any other electronic device.

## **Rules Covering Gross Misconduct**

An employee will be liable to summary dismissal if they are found to have acted in any of the following ways:

- Gross insubordination
- Serious breach of health and safety rules
- Serious breach of the school email and internet use policy
- theft or fraud from either the School or co-workers or deliberate damage to School property or that of co-workers;
- being under the influence of drink or illegal drugs at work;
- disorderly or threatening conduct on school premises;
- contravention of the equal opportunities and discrimination policy;
- negligence resulting in serious loss, damage, or injury;
- assault or attempted assault;
- falsification of records;
- conviction on a criminal charge;
- acceptance of a police caution;
- serious breach of School policies or procedures;
- bullying or harassment of colleagues, pupils or parents;
- abuse or suspected abuse of your position of trust in relation to pupils at the School;
- bringing the School into disrepute.

# **ARRANGEMENT SUMMARY**

## 6. ARRANGEMENT SUMMARY

### Risk Assessments

Risk assessments will be undertaken by:

<b>Classroom:</b>	The Bursar
<b>Maintenance:</b>	The Bursar
<b>Cleaning:</b>	The Bursar
<b>Educational Visit:</b>	Head of Department

### Consultation with Employees

Health and Safety Committee Representatives are:

Kelly Freeman- The Bursar  
Michael Moss - Health and Safety Officer & Head of Design and Technology  
Representatives from Pre-Prep and Prep  
Representatives from Sports Department

Minutes of meetings are available to view at: The Bursar's Office

### Building, Plant and Equipment Maintenance

The person responsible for the maintenance of plant and equipment is: The Bursar

### Asbestos

The responsible person in control of asbestos in school is:

The Bursar

The asbestos register is located:

Bursar's Office

## **Safe Handling and Use of Substances**

The person responsible for identifying hazardous substances and obtaining Data Sheets is:

<b>Maintenance:</b>	The Bursar
<b>Cleaning:</b>	The Bursar
<b>Classroom:</b>	Head of Department

## **Competency for Tasks**

Induction training is the responsibility of:

The Bursar

## **First Aid and Accidents**

Details of first aiders can be found in the school office

First Aid Boxes can be found at:

The School Office

The Accident Book is located:

The School Office

The persons responsible for RIDDOR notifications are:

The Bursar

---

**Fire**

Escape routes and exits are checked by:

Health and Safety Officer

Alarms are tested weekly by:

Health and Safety Officer

Fire drills are organised termly by:

Health and Safety Officer

**Educational Visits**

The person responsible for co-ordinating educational visits is:

Heads of Department

**Contractors and Safety**

The person responsible for approving contractors who work within school is:

The Bursar

# ARRANGEMENTS

## 7. ARRANGEMENTS

### Accident, Incident and Ill-Health Recording, Reporting and Investigation

This policy sets out the procedures that are to be followed when any employee, pupil, visitor or contractor has an accident, near miss or dangerous occurrence on the school's premises.

Employees who develop a work-related illness must also report via these procedures.

#### **Definitions:**

An **accident** is an unplanned event that causes injury to persons, damage to property or a combination of both.

A **near miss** is an unplanned event that does not cause injury or damage but could do so.

A **work-related illness** is illness that is contracted by an employee through the course of work as a result of activities carried out by the school.

#### **The Accident Book**

All accidents resulting in personal injury must be recorded on an Accident Report Form (in the Accident Book).

Completed Accident Report Forms will be stored to comply with the requirements of the Data Protection Act.

Completed Accident Report Forms will be reviewed regularly by the Bursar to ascertain the nature of incidents that have occurred in the school. This review will be in addition to any investigation of the circumstances surrounding each incident.

All near misses must also be reported to The Bursar as soon as possible so that action can be taken to investigate the causes and to prevent recurrence.

Employees must ensure that they are aware of the location of the accident book.

## Reporting Requirements

Certain accidents causing injury, both fatal and non-fatal, certain occupational diseases and certain dangerous occurrences are reportable to the Enforcing Authority under the Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013 (RIDDOR).

Specified injuries including the following reportable events must be reported by the quickest means practicable, usually the telephone:

- death
- A specified injury to an employee as detailed in regulation 4
- An injury to a non-employee where that person is taken directly to hospital for treatment as a result of their injury
- Any dangerous occurrence
- Any employee diagnosed by a qualified medical practitioner as suffering from a disease specified in the Regulations
- Any employee diagnosed with a cancer caused by work-related exposure to a known carcinogen or mutagen.

Incapacitation for work of a person for more than 7 consecutive days as a result of an injury caused by an accident at work must be notified within 15 working days.

*To calculate whether the absence classifies as 'over 7-day':*

- exclude the day of the incident if they went home or did not return to work on the day
- include weekends, bank holidays and weekdays (whether the person would normally work on them or not).

*Example: If a person has an accident on Friday and comes back to work the following Friday, then count Saturday, Sunday, Monday and Tuesday etc but this is still only 6 days; however if their next day of work is the Monday it would count as 9 days and would be reportable.*

### **Non-Consensual Violence**

Major or over 7 day injuries to people at work arising from non-consensual violence are notifiable.

## Reporting of accidents involving Pupils or visitors

If a pupil or visitor has an accident this must be reported if:

- the person involved is killed or taken to hospital and;
- the accident arises out of or in connection with a work activity

Examples of 'in connection with a work activity' are:

- work organisation – supervision of a field trip
- plant or substances – lifts, machinery, experiments
- condition of premises, play grounds, play or PE equipment
- sports activities as part of the curriculum where there is death or hospitalisation
- playground accidents due the condition of the premises or inadequate supervision.

For further advice on injuries, diseases or dangerous occurrences requiring notification please contact the **Ellis Whittam Advice Line. (Tel: 0845 226 8393).**

**Contact** details for the Health and Safety Executive are:

**Tel:** 0345 300 9923 (Monday to Friday 8:30am to 5:00pm)

**Website:** [www.hse.gov.uk](http://www.hse.gov.uk)

Information on notifications to the enforcing authority must also be sent to Ellis Whittam Ltd.

The completed report form should be kept with other accident records and documents on the accident investigation.

Forms are kept to advise the insurers of a potential claim and to present to the Enforcing Authority in the event of an investigation.

Records are to be kept for 3 years from the date of the incident.

## **Investigation**

All injury related accidents that are either notified to the Enforcing Authority or where a serious injury has occurred will be investigated:

- to ensure that all necessary information in respect of the accident or incident is collated
- to understand the sequence of events that led to the accident or incident
- to identify the unsafe acts and conditions that contributed to the cause of the accident or incident
- to identify the underlying causes that may have contributed to the accident or incident
- to ensure that effective remedial actions are taken to prevent any recurrence
- to enable a full and comprehensive report of the accident or incident to be prepared and circulated to all interested parties
- to enable all statutory requirements to be adhered to.

The investigation will include obtaining signed witness statements, photographs and drawings as appropriate.

## **Asbestos**

The school will protect employees, pupils and other persons potentially exposed to asbestos as far as is reasonably practicable. Everyone who needs to know about the presence of asbestos will be alerted. No one will be allowed to start any work that could disturb asbestos unless the correct procedures are to be employed.

This will be achieved by minimising exposure through the management of asbestos-containing materials in school premises by the following arrangements.

### **Assessment**

The premises will be surveyed to determine whether asbestos-containing materials are present. It will be presumed that materials contain asbestos unless there is strong evidence to the contrary.

The amount and condition of the asbestos-containing material will be assessed and measures will be identified to ensure that airborne asbestos fibres are not present or formed in the workplace.

### **A Written Plan**

A written plan or register that sets out the location of the asbestos-containing material and how the risk from this material will be managed will be prepared and steps will be taken to put the plan into action. The plan or register will be made available and the arrangements will be reviewed at regular intervals or when there has been a significant change to the organisation or personnel.

### **Access to Asbestos-containing Materials**

Access to asbestos-containing materials in the premises will be controlled so as to prevent inadvertent disturbance of the material and the release of asbestos fibres. Procedures will be put in place to ensure that anyone liable to disturb asbestos-containing materials is made aware of their location.

### **Monitoring and Maintenance**

The condition of all asbestos-containing materials or materials suspected of containing asbestos will be inspected at agreed intervals to ascertain that there has been no damage or deterioration. Where damage or deterioration is found the asbestos-containing material will be reassessed and repaired or removed as appropriate.

### **Training and Information**

Employees who may come into contact with asbestos containing materials (ACM's) through the course of their work will receive adequate training and information such that they can recognise potential ACM's and know what precautions to take.

## **Asbestos-related Emergencies**

Procedures to deal with asbestos-related incidents will be put in place (including the provision of information and warning systems) unless there is only a slight risk to the health of employees, pupils and others.

## **Arrangements for Controlling Work on Asbestos**

Any work on, or removal of, asbestos-containing materials will be controlled to ensure that adequate precautions are taken to prevent the release of asbestos fibres.

Work with asbestos and asbestos-containing materials is to be carried out by a licensed contractor (licensed by the HSE) unless the work is exempted from the requirement for licensing.

## **Selection and Control of Contractors to Work on Asbestos-containing Materials**

When contractors are engaged to work on school premises, adequate steps will be taken to ensure the contractors are competent and have sufficient skills and knowledge to do the job safely and without risks to health.

Only contractors licensed by the HSE will be used for the removal of asbestos-containing materials, unless the work involves the removal of materials in which:

- asbestos fibres are firmly linked in a matrix
- the exposure during the removal process is likely to be sporadic or of low intensity

Contractors hired to carry out building or allied trade work that will involve minor work with asbestos must comply with the Control of Asbestos Regulations 2012.

## **Procedures for Dealing with Health and Safety Issues**

Where an employee raises a health and safety problem related to work with asbestos, the school will:

- take all necessary steps to investigate the circumstances • take corrective measures where appropriate
- advise the employee of actions taken.

Where a problem arises relating to the condition of, or during work on, asbestos-containing material, the employee must inform the Bursar and in the case of an accident or emergency, respond quickly to ensure effective treatment.

## **Communication and Consultation**

It is a legal requirement for the school to establish arrangements to communicate and consult with staff on issues affecting their health and safety and to take account of their views.

To achieve this objective we will:

- establish effective lines of communication
- involve and consult with staff through:
  - o individual conversations
  - o notice boards
  - o internal publications
  - o staff meetings
  - o health and safety meetings.
- display the 'Health and Safety Law – What You Need To Know' poster
- consult with staff when changes to processes, equipment, work methods etc. are to be introduced that may affect their health and safety.

Where it is not practical to consult with all staff directly and it would be more appropriate to communicate and consult through employee representatives, we will arrange for representatives of employee safety to be elected.

The school will allow all representatives an appropriate amount of time away from their normal duties in order to complete their duties as representatives. We will not hinder representatives in the execution of their normal functions as defined by law.

## **Contractors**

When working on school premises it is considered that contractors are joint occupiers for that period and therefore we have both joint liabilities in “common areas”. In order to meet our legal obligations with regard to contractors we will ensure that prior to engaging any contractor they are competent and that any works are carried out safely.

The following factors will be considered as part of our procedures for vetting contractors:

- sight of the contractor’s own safety policy, risk assessments, method statements, permits to work, etc as applicable
- clarification of the responsibility for provision of first aid and fire extinguishing equipment
- details of articles and hazardous substances intended to be brought to site, including any arrangements for safe transportation, handling, use, storage and disposal
- details of plant and equipment to be brought onto site, including arrangements for storage, use, maintenance and inspection
- clarification for supervision and regular communication during work including arrangements for reporting problems or stopping work in cases where there is a serious risk of personal injury
- confirmation that all workers are suitably qualified and competent for the work (including a requirement for sight of evidence where relevant)
- evidence showing that appropriate Employers and Public Liability Insurance is in place

Clearly, it will not be necessary to go to such elaborate lengths if the contract is very short and will not create hazards of any significance. The complexity of the arrangements will be directly proportional to the risks and consequences of failure.

Similarly we have a parallel duty to the contractor and must ensure that the contractor is not put at risk by our own activities for the duration of the contract.

We will stop contractors working immediately if their work appears unsafe. Staff should report any concerns to the Bursar immediately.

## **Construction work and the Construction (Design and Management) Regulations 2015**

Where any construction work is carried out, to fulfil our legal duties as a “client” under the Construction (Design and Management) Regulations 2015 we will:

- make suitable arrangements for the management of the project and review those arrangements throughout the project to ensure that they are still relevant
- ensure that all dutyholders that we appoint have the necessary skills, knowledge and experience to carry out their roles safely
- appoint in writing the Principal Designer and Principal Contractor sufficiently early in the project to allow them to carry out their duties properly
- notify the HSE in writing for projects that require it
- ensure that relevant pre-construction information is passed to all designers and contractors
- ensure that the Principal Designer and Principal Contractor carry out their duties
- ensure that adequate welfare facilities are provided for the contractors
- ensure that no construction commences until an adequate health and safety plan and construction phase plan covering the work has been prepared
- ensure that any health and safety file passed to us is kept securely and readily available for inspection by anyone who requires it to fulfil their legal duties, and, if we choose to dispose of the building, to pass the file to any person or company who acquires the building.
- cooperate fully with all other dutyholders and provide all relevant information and instruction promptly and clearly.

## **Design and Technology**

This policy outlines the procedures for ensuring safe working in Design and Technology (Textiles Technology, Food Technology, Graphics and Product Design). All staff are required to follow this policy to minimise risks to themselves, to pupils and to others. Teachers are expected to use this information to help them to plan lessons and decide if an activity can be carried out safely, giving consideration to the age and responsibility of the pupils.

Only the Head of DT, or his nominated deputy is permitted to use the DT lab. Non-specialist staff must not use the room in order to teach or to use any equipment.

### **Communication, information and training**

The Head of Department is responsible for ensuring that all staff are made aware of this policy and ensuring that the procedures are followed, providing suitable training or directing new staff to an appropriate member of staff, and for recording the dates and content of any training given.

Trainee teachers who are following a recognised teacher training course should be supervised by a qualified teacher at all times when they are engaged in practical work. Such trainees may use machines and may show pupils how to use machines as part of the lessons that they are teaching provided that appropriate supervision is maintained. This supervision may be progressively reduced, depending on the competence of the individual trainee teacher. In such instances a specific risk assessment of the situation should be carried out, and the degree of supervision needed discussed with the Head of Department.

Generally, the department follows guidance in *BS 4163:2014 Health and safety for design and technology in schools and similar establishments – Code of practice* and is also licensed to use CLEAPSS. A copy of the code is available in school and all teachers within the department are given access to the CLEAPSS website.

### **Monitoring and checking**

The school requires the D&T department to monitor the implementation of this policy. Records of monitoring are kept by the Head of Department.

Equipment and machines will be checked in accordance with current guidelines and records kept.

## **Risk assessments**

The school follows the recommendation of the Health and Safety Executive to adopt published 'model' or 'general' risk assessments which the D&T department adapts to the school curriculum and facilities.

Whenever a new course is adopted or developed, all activities (including preparation and clearing-up work) are to be checked against the model risk assessments and significant findings incorporated into texts in daily use, i.e., the scheme of work, set of lesson plans, syllabus, technician notes.

If a model risk assessment for a particular operation involving hazards cannot be found in these texts, a special risk assessment must be completed.

Every activity is to be assessed for risk including working with simple hand tools as well as potentially hazardous processes such as wood machining. An attempt is made to balance the desire to eliminate risk with the need to reduce risk in order to maintain practical work, e.g. certain activities may be demonstrated in order to reduce the level of risk to pupils.

It is the responsibility of all staff and other adults to follow the relevant risk assessments and lesson plans.

## **Equipment Safety**

New equipment will be purchased that is safe and suitable for the intended purpose and to comply with the *Provision and Use of Work Equipment Regulations*. Equipment listed by specialist educational equipment suppliers is taken to meet these Regulations but all other equipment, especially gifts, are to be treated with caution and carefully assessed.

## **Use of guards**

All staff in the department must use all guards and other safety devices on machines and other equipment at all times. Under no circumstances should any guard or other safety device be removed or not used to enable a task to be done. Any operation which cannot be done with guards and other safety devices in place must not be done.

## **Maintenance, Inspection and Testing of Equipment**

All equipment and machinery must be maintained in a safe condition. To achieve this, equipment will be regularly maintained, inspected and, where necessary, tested.

There are 3 levels of inspection, maintenance and testing of equipment which must be carried out.

These are:

**Level 1:** A visual check by staff of equipment prior to its use or on a daily basis.

**Level 2:** A more formal visual inspection which should be carried out termly by staff. This requires checking equipment against an inventory using a checklist. Small items, e.g. hand tools, knives, can be banded together.

**Level 3:** Formal maintenance/inspection checks carried out by specialist contractors. This is normally undertaken annually except for LEV (Local Exhaust Ventilation) which is carried out every 14 months. This includes PA testing, no electrical equipment should be used in the academy unless it has in up to date PAT sticker.

When maintenance of equipment is carried out all machines must be isolated from the power supply and the fuses removed or the isolator locked off. A notice stating that the machine is under maintenance should be fixed to the machine. A risk assessment of the hazards involved in the task should be carried out before the work is started.

## **Recording of Inspections and Testing**

All Level 2 formal inspections of equipment by members of staff should be recorded. An up to date record of Inspections will be maintained by the technicians on a weekly basis.

All Level 3 inspections/maintenance must be recorded. It is recommended that the subject leader holds records of examinations, tests and certificates. This information will be kept in the office in the health and safety folder.

If any faults, or the need for maintenance, are identified at any time, they must be reported to the Head of Department. If the fault or need for maintenance makes the equipment unsafe, it must not be used and must be electrically isolated. An appropriate label must be clearly displayed on the equipment.

## **Pressure Vessels**

Autoclaves and pressure cookers need periodic inspection, normally annually, under the Pressure Systems Safety Regulations. Records of examinations are kept on file.

## **Local exhaust ventilation**

The school requires the regular testing of local exhaust ventilation equipment (dust extraction and fume extraction from heat treatment areas) every 14 months. The Head of Department has the responsibility of seeing that this happens. The records of the tests are available for staff reference and for inspection by an HSE Inspector on file.

## **Room Safety**

All practical rooms must be locked when not in use.

Unsupervised pupils must not be allowed in hazardous rooms.

When starting a practical lesson, staff should check that rooms are clear, all thoroughfares and room exits are free from obstruction, floors are dry and in a safe condition, and the lighting is adequate for the work being undertaken.

Fire doors must be unlocked and clear.

Only authorised staff are permitted to switch on the electricity and gas mains isolators. Pupils may not switch on these – not even under supervision.

Pupils must not use utensils, tools, machines or other equipment until they have been taught how to use them correctly.

Particular care should be given to the distribution and collection of hand-tools and of small items of equipment, the number and condition of which should be checked at both the beginning and the end of an activity or a lesson.

Only one person may operate a machine or piece of equipment at a time.

No non DT teaching may take place in the DT room.

Cover lessons are not taught in the DT room – cover set is always theory based rather than practical.

Pupils and staff are not to eat or drink in a room/workshop - this includes break and lunch times. The Head of DT may eat or drink in the theory side of the room only.

Large volumes of shavings, sawdust and plastic cuttings are likely to constitute a fire hazard and so clearance and disposal should take place on a regular basis, rather than at the end of the day. Excessive dust from machining operations and 'walked in' dirt contribute to respiratory problems and should be removed by vacuuming on a regular basis, rather than by sweeping.

At the end of the day and particularly at weekends, all tool and storage cupboards should be locked where possible, key switches and main electrical supplies isolated, all machine tools and bench shears padlocked and all electrical equipment turned off. It is the responsibility of the teacher in charge of the room to make sure that all systems are safe, all hot items are cool and that everything is closed down safely before they leave the building.

All D&T areas are made safe for cleaners or contractors to work in before these persons are allowed to proceed.

## **Storage**

Storage must be kept well organised and tidy. Large items should not be stored high and proper stepladders or similar must be available for reaching high shelves safely.

All chemicals should be stored in accordance with the COSHH Regulations and risk assessments must be in place dealing with their safe use.

Standing on benches, chairs, tables to watch a demonstration/get equipment etc. is not permitted.

Sharp tools and utensils must be stored so that accidental contact with the sharp part is unlikely and they must be securely locked when not in use.

All materials which are hazardous, for example they may be toxic, flammable or corrosive, must be clearly labelled. The labelling must state the material and the nature of the hazard(s).

Keep all working quantities of these materials to a minimum.

Access to hazardous materials must be restricted to authorised staff only (technicians).

All hazardous materials must be stored away from direct access by pupils.

Stocks of flammable liquids must be stored in a lockable fire-resistant cabinet in a well-ventilated stockroom.

All sharp craft knives should be stored in a locked cupboard or room.

No sharp knives should be left unattended in a classroom.

## **Shelving**

Shelves must not be overloaded and heavy materials must not be stored high up.

Proper stepladders must be provided for access to shelving beyond easy reach from the floor.

## **Safety Signs, Notices and Displays**

Each workroom must have a set of safety rules and procedures displayed clearly. Cautionary notices and signs must be displayed where appropriate.

## **Personal Protective Equipment**

The school accepts the duty to provide eye protection, gloves, overalls and aprons for employees where the risk assessment requires them and safety spectacles for pupils.

Eye protection must be worn by all staff and pupils when using any machine or when soldering using soldering irons. Eye protection should be used for any other operation where the risk assessment shows it is required. Eye protection must conform to BS EN166.

The employer expects eye protection to be available for pupils and visitors. Safety spectacles are provided for general use, with a set of goggles or face shields used whenever the risk assessment requires them.

The condition of the eye protection is checked before each use.

Protective clothing such as aprons must be used in lessons where pupils could get dirty during practical work, or where hazardous materials are being used.

## **Emergency procedures**

In the event of a fire sound the fire alarm.

On hearing the fire alarm staff should turn off the gas, electric and any machinery or equipment and make their way to the assembly point.

In the event of a fire and if it is safe to do so staff should attempt to extinguish a fire using the appropriate fire extinguisher.

## **Disabled Persons including Pupils with Special Education Needs (SEN)**

The school will give full and proper consideration to the needs of disabled employees, pupils and visitors.

To achieve this, the school will:

- treat all disabled employees, pupils and visitors with respect and dignity, both in the provision of a safe working environment and in equal access to the school's facilities
- ensure that risk assessments are undertaken of the special needs of the disabled and carry out reasonable adjustments to the premises and/or employment arrangements
- encourage employees with special needs to suggest any premises or task improvements to their line managers
- discipline any employees found treating their disabled colleagues with less than the expected standards of respect and dignity
- in an emergency evacuation, ensure suitable plans are in place which will assist disabled people to leave the premises swiftly (see Fire Policy)

Risk assessment of pupils with Special Education needs will consider:

- manual handling of pupils with physical disabilities
- pupils unable to recognise everyday hazards, communicate distress, or move around independently
- using mechanical aids and equipment
- using therapy and ball pools
- administering medical treatment and minimising the risk of infection
- management of difficult behaviour and the use of restraint
- lone working where an employee works on a one-to-one basis with a SEN pupil; and transport issues such as getting learning disabled or physically disabled pupils in and out of transport and making sure that access to the premises is appropriate.

## **When to assess**

So far as is reasonably practicable risk assessments of the pupils with special education needs will be made:

- before pupils are admitted – this is a planning ahead exercise
- when planning educational activities both on and off site
- when planning and purchasing new facilities and when work practices are to be introduced or changed
- when deciding on a placement
- when an existing pupil develops a health need, e.g. after an operation, or where a significant change in their existing needs occurs
- when a pupil is to undertake work experience.

## **Display Screen Equipment**

All reasonable steps will be taken by the school to secure the health and safety of employees and pupils who work with display screen equipment.

To achieve this objective the school will:

- identify those employees who are users as defined by the regulations, see below
- carry out an assessment of each user's workstation
- implement necessary measures to remedy any risks found as a result of the assessment
- provide adequate information and training to persons working with display screen equipment
- endeavour to incorporate changes of task within the working day, to prevent intensive periods of on-screen activity
- review software to ensure that it is suitable for the task and is not unnecessarily complicated
- arrange for the provision of free eye tests when requested, at regular intervals thereafter and where a visual problem is experienced
- arrange for the supply, at subsidised cost, any corrective appliances (glasses or contact lenses) where these are required specifically for working with display screen equipment
- advise existing employees, and all persons applying for work with display screen equipment, of the risks to health and how these are to be avoided
- investigate any discomfort or ill-health believed to be associated with the use of display screen equipment and take appropriate remedial action
- make special arrangements for individuals with health conditions that could be adversely affected by working with display screen equipment.

### **'Users'**

This policy is aimed at those who regularly use DSE:

- a) for continuous periods of more than one hour *and*
- b) for more than 2½ hours per day.

Typically this will therefore apply to administrative functions, the teaching of computer skills and other prolonged users. Others who operate DSE, including pupils, should have a workstation which meets the standards set down in the regulations but are not entitled to financial contributions.

**Employees must:**

- comply with the instructions and training given regarding safe workstation set-up and use, including the need for regular changes of activity or breaks and the use of the equipment provided
- inform their manager of any disability or health condition which may affect their ability to work using display screen equipment or be affected by working with DSE (this information will be treated confidentially)
- report to their manager any discomfort or health concern believed to be associated with the use of DSE (this information will be treated confidentially).

**Eye tests**

Under the DSE regulations staff identified as DSE users are entitled to an eyesight test, every 2 years by a qualified optician (and corrective glasses if required specifically by the Optician for DSE use).

**Summary of Key Actions**

The key actions necessary to control the health and safety risks arising from the use of Display Screen Equipment (DSE) are to:

- identify all individuals who are classified as DSE 'Users'
- ensure risk assessments of DSE workstations been carried out using the Display Screen Equipment Workstation Assessment Form
- supply users with information and/or training on the safe use of Display Screen Equipment
- advise staff about setting up laptops on a suitable surface and the risks of working for prolonged periods
- ensure remedial actions identified by DSE risk assessments been carried out
- review risk assessments annually or sooner if significant changes have occurred.

## **Driving**

The school is committed to reducing the risks to its staff, pupils and others when being driven in the school minibus and therefore will:

- ensure risk assessments are completed and that journeys are planned
- not put unreasonable time constraints on travel
- ensure drivers are competent and fit to drive
- provide any additional training that may be deemed necessary to reduce driving related occupational risks
- provide sufficient information and guidance for drivers to enable them to understand the additional occupational risks involved in driving
- require drivers to annually submit copies of their current driving licence
- provide adequate insurance for the vehicle, the driver, occupants and third parties
- maintain them to the required legal standard and ensure suitable for their purpose
- provide and maintain additional tools and equipment necessary for the purposes of the journey
- provide access to breakdown support and recovery
- provide no smoking signs for inside the vehicle
- ensure the vehicle carries a suitably equipped first aid box.

## Drivers

Drivers will remain responsible for their safety and others and must comply with the Highway Code and Road Traffic Act.

It is the responsibility of drivers to inform the Transport Coordinator of:

- anything that could affect their driving e.g. health conditions or injuries, use of prescribed medication
- changes to licence such as limitations, offences recorded, period bans
- vehicle defects that affect ability / safety to drive
- any accidents / incidents that occurred whilst driving on behalf of the school

Before driving, drivers must:

- review the need to travel
- have a valid licence for the vehicle they are driving
- carry out a pre-use vehicle check
- allow sufficient time to drive allowing for traffic, poor weather and rest breaks
- ensure sufficient rest
- be physically fit, with zero alcohol level and not under the influence of drugs that may affect the ability to drive
- adjust their driving position, head restraints and mirrors to ensure maximum comfort and safety.

Whilst driving, drivers must:

- drive in accordance with the applicable law and with consideration for the safety of passengers and other road users
- take regular rest breaks every 2-3 hours or at first signs of tiredness
- remain in control of the vehicle at all times
- not smoke
- not use a mobile phone or other electronic device.

- follow all safety instructions when taking their vehicle on board ferries, trains or other vehicle carrying craft, including parking and leaving their vehicle on a vehicle deck and travelling in a designated passenger area while the craft is underway.

## **Drugs and Alcohol**

### **Alcohol**

Staff must not drink alcohol on school premises without express permission from the Headmaster.

Any member of staff who is found consuming alcohol on school premises without permission or is found to be intoxicated at work will face disciplinary action on the ground of gross misconduct under the school's disciplinary procedure.

### **Drugs and medication**

The possession, use or distribution of drugs for non-medical purposes on school premises is strictly forbidden and a gross misconduct offence.

If you are prescribed drugs by your doctor which may affect your ability to perform your work you should discuss the problem with your line manager.

If the school suspects there has been a breach of this policy or your work performance or conduct has been impaired through substance abuse, the school reserves the right to require you to undergo a medical examination to determine the cause of the problem.

### **Medical Examination**

Existing and prospective members of staff may be asked to undergo a medical examination, which will seek to determine whether he/she has taken a controlled drug or has an alcohol abuse problem.

A refusal to give consent to such an examination or a refusal to undergo the screening will result in the immediate withdrawal of any offer made to prospective staff and will normally be treated as gross misconduct for current members of staff.

If, having undergone a medical examination, it is confirmed that you have been positively tested for a controlled drug, or you admit there is a problem, the school reserves the right to suspend you from your employment (with or without pay) to allow the school to decide whether to deal with the matter under the terms of the school's disciplinary procedure and/or to require you to undergo treatment and rehabilitation.

### **Reasonable Grounds**

The school reserves the right to search you or any of your property held on school premises at any time if there are reasonable grounds to believe that this policy is being or has been infringed or for any other reason. If you refuse to comply with these search procedures, your refusal will normally be treated as gross misconduct.

The school reserves the right to inform the police of any suspicions it may have with regard to the use of controlled drugs by its employees on school premises.

## **Educational Visits – covered in the Educational Visits (including EYFS) Policy and Critical Incident Plan**

## **Electricity**

All reasonable steps will be taken to secure the health and safety of employees, pupils and others who use, operate or maintain electrical equipment.

To ensure this objective the school will:

- ensure electrical installations and equipment are installed in accordance with the Wiring Regulations (BS 7671) published by the Institution of Engineering and Technology (IET)
- maintain the fixed wiring installation in a safe condition by carrying out routine safety tests
- inspect and test portable and transportable equipment as often as required to ensure safety
- inspect and test second-hand electrical equipment lent to, or borrowed by, the school
- promote and implement a safe system of work for maintenance, inspection and testing
- forbid live working unless absolutely necessary, in which case a permit to work system must be used
- ensure employees and contractors who carry out electrical work are competent to do so
- maintain detailed records.

### **Employees must:**

- visually check electrical equipment for damage before use
- report any defects found to their manager. However, if there is any doubt whether the equipment is safe then it should be labelled 'out of use' and withdrawn until it has been tested and declared fit for use by a qualified person
- not use defective electrical equipment
- not carry out any repair to any electrical item unless qualified to do so
- switch off non-essential equipment from the mains when left unattended for long periods
- not bring any electrical item onto school premises until it has been tested and a record of such a test has been included in the appropriate record
- not leave electric cables in such a position that they will cause a tripping hazard or be subject to mechanical damage
- never run extension leads under carpets or through doorways
- not daisy-chain extension leads to make a longer one
- not use adapter sockets – devices that plug into mains sockets to increase the number of outlets.

### **Summary of Key Actions**

The key actions necessary to control the health and safety risks arising from electricity are as follows:

- The main electrical installation should be tested every five years except for those parts of schools with:
  - a) a licensed areas
  - b) lightning protection which should be tested annually
- Retain copies of electrical test certificates
- A record must be kept of all portable items of electrical equipment showing:
  - a) the detail of the item
  - b) the date of acquisition
  - c) -details of any inspection, testing or repair work
- arrange for the inspection and testing of portable electrical.

### **Fire – see Fire Policy**

All reasonable steps will be taken to prevent a fire occurring. In the event of fire, the safety of life will override all other considerations, such as saving property and extinguishing the fire.

In order to prevent fire and to minimise the likelihood of injury in the event of a fire the school will:

- assess the risk from fire at our premises and implement appropriate control measures
- ensure good housekeeping standards are maintained to minimise the risk of fire
- provide and maintain safe means of escape from the premises
- develop a fire evacuation procedure for all buildings
- provide and maintain appropriate fire-fighting equipment including the sprinkler system
- provide sand in bags in the Science Department as a precaution when using flammable metals
- regularly stage fire evacuation drills, inspect the means of escape and test and inspect fire-fighting equipment, emergency lighting and any fire warning systems
- provide adequate fire safety training to employees, plus specialist training to those with special responsibilities
- make arrangements for the safe evacuation of deaf or otherwise disabled persons
- make arrangements for ensuring all pupils and visitors are made aware of the fire evacuation procedures
- display fire action notices
- keep fire safety records.

The school does not require persons to attempt to extinguish a fire but extinguishing action may be taken if it is safe to do so.

Immediate evacuation of the building must take place as soon as the evacuate signal is given. All occupants, on evacuation, should report to the pre-determined assembly points.

Re-entry of the building is strictly prohibited until the fire brigade officer or a senior person present declares it is safe to do so.

Employees are encouraged to report any concerns regarding fire procedures so the school can investigate and take remedial action if necessary.

### **Summary of Key Actions**

The key actions required to ensure fire safety is effectively managed are:

- a) complete and review annually a fire risk assessment

- b) arrange for fire safety checks to be completed and recorded for the following:
  - o fire evacuations (drills)
  - o fire alarm tests
  - o fire escape route checks
  - o extinguisher checks
  - o emergency lighting tests
  - o post fire evacuation notices.
- c) develop personal evacuation plans (PEEP) for people with special needs
- d) provide fire safety training
- e) service the fire alarm and emergency lighting as appropriate.

**FIRE MAINTENANCE/TEST PROCEDURES**

<b>FIRE DRILLS</b>		
<b>TERMLY</b> Fire Evacuations must be carried out at least once in each term.	Ensure all occupants are able to evacuate to a place of safety in a reasonable time. (3 minutes)	Record details of drill, evacuation time and any problems.
<b>FIRE ALARM PANEL / SYSTEM</b>		
<b>DAILY</b>	Check fire alarm panel for normal working conditions	Report any faults and actions
<b>WEEKLY</b>	<p>Fire alarm audibility test conducted at a different call point tested each week in rotation. Number each call point for identification. (each zone to be tested every 13 weeks)</p> <p>Check alarm is audible in all areas (test to be carried out during full occupation)</p>	Record details of call point test and call point number. Repair / replace defective units
<b>SIX MONTHLY</b>	<p>For systems with battery back up a six monthly battery check by a competent service engineer is required.</p> <p>This check may also include 50% of the automatic smoke / heat detectors, sounders and manually operated devices</p>	Site to keep maintenance records
<b>ANNUALLY</b> For 230 volt systems without battery back up	<p>An annual test and examination of the alarm system by a competent service engineer is required.</p> <p>Test and examination of alarm system by competent service engineer including all automatic smoke / heat detectors, sounders and manually operated devices.</p>	Site to keep maintenance records.

<b>MEANS OF ESCAPE</b>		
<b>DAILY</b>	<p><b>Check for any obstructions on escape routes (internally and externally)</b></p> <p>Doors: check self closing devices, and that push bars/ other emergency fastening devices are operational</p>	Site to record details and actions only if there is a fault
<b>WEEKLY</b>	<p>Check all internal fire doors for ease of opening, that they are a good fit, closing fully, fire door seals and self closures working correctly, correctly signed etc.</p>	Site to record details and actions only if there is a fault
<b>MONTHLY</b>	<p>Check all electronic release mechanisms on escape doors work correctly (i.e. fail safe in the open position on activation of alarm / loss of power)</p>	Site to record details and actions only if there is a fault
<b>FIRE FIGHTING EQUIPMENT</b>		
<b>WEEKLY</b>	<p>Check all extinguishers, fire blankets etc. are available for use, undamaged and unobstructed.</p> <p>Extinguishers properly affixed to wall brackets or on plinths.</p> <p>Check for any evidence of tampering.</p>	Site to record details and actions only if there is a fault
<b>ANNUALLY</b>	<p>Full check and test of extinguishers, fire blankets etc. by competent service engineer.</p>	Maintenance records to be kept on site.

EMERGENCY LIGHTING (WHERE APPLICABLE)		
DAILY	<p>Check indicator lights functioning (report faults to contractor)</p> <p>Operate and replace batteries in torches if necessary.</p>	Site to record details and actions only if there is a fault
MONTHLY we don't do this! Do we have to? We have a service contract	In house operational test for a short period (a maximum of one quarter of the rated duration).	Maintenance records to be kept on site.
YEARLY	Emergency lighting full duration discharge test by competent person.	Maintenance records to be kept on site.

## Fire Safety training in the School

The school will provide adequate fire safety training for staff. The type of training should be based on the particular features of the school and should:

- take account of the findings of the fire risk assessment;
- explain the emergency procedures;
- take account of the work activity and explain the duties and responsibilities of staff;
- take place during normal working hours and be repeated periodically where appropriate; • be easily understandable; and
- be tested by fire drills.

Pupils will also be involved in some aspects of fire safety training, particularly with respect to fire drills, etc.

Fire training should include the following:

- what to do on discovering a fire
- how to raise the alarm and what happens then
- what to do upon hearing the fire alarm
- the procedures for alerting pupils, members of the public and visitors including, where appropriate, directing them to exits
- the arrangements for calling the fire and rescue service
- the evacuation procedures for everyone in your premises (including young children or mobility impaired persons) to reach an assembly point at a place of total safety
- the location and, when appropriate, the use of fire fighting equipment
- the location of escape routes, especially those not in regular use
- how to open all emergency exit doors
- the importance of keeping fire doors closed to prevent the spread of fire, heat and smoke
- where appropriate, how to stop machines and processes and isolate power supplies in the event of a fire
- the reason for not using lifts (except those specifically installed or nominated, following a suitable fire risk assessment, for the evacuation of people with a disability)
- the safe use of and risks from storing or working with highly flammable and explosive substances
- the importance of general fire safety, which includes good housekeeping; and

- the use of premises by outside bodies, e.g. IT training, music, etc
- All staff identified in the emergency plan that have a supervisory role if there is a fire should be given details of your fire risk assessment and receive additional training.

In addition to the guidance above as a minimum all staff should receive training about:

- the items listed in your emergency plan
- the importance of fire doors and other basic fire-prevention measures
- where relevant, the appropriate use of fire fighting equipment
- the importance of reporting to the assembly area
- exit routes and the operation of exit devices, including physically walking these routes
- general matters such as permitted smoking areas or restrictions on cooking other than in designated areas
- assisting disabled persons where necessary.

Training is necessary:

- when staff start employment or are transferred into the premises
- when changes have been made to the emergency plan and the preventive and protective measures
- where working practices and processes or people's responsibilities change
- to take account of any changed risks to the safety of staff, pupils or other relevant persons
- to ensure that staff know what they have to do to safeguard themselves and others on the premises; and where staff are expected to assist disabled persons.

Training should be repeated as often as necessary and should take place during working hours.

Enforcing authorities will want to examine records as evidence that adequate training has been given.

## **Training of Pupils**

It is good practice to provide pupils and pupils with some form of fire safety training so that they are aware of the actions to be taken in the event of a fire. This should include instruction on the:

- details of the evacuation plan
- importance of fire doors and other basic fire-prevention measures
- importance of reporting to the assembly area
- exit routes and the operation of exit devices.

### **First Aid**

The school is committed to providing sufficient provision for first aid to deal with injuries that arise at work or as a consequence of school activities.

To achieve this objective the school will:

1. appoint and train a suitable number of first aid personnel
2. display first aid notices with details of first aid provision
3. provide and maintain suitable and sufficient first aid facilities including first aid boxes
4. provide any additional first aid training that may be required to deal with specific first aid hazards.

The school has a first aid policy which details further information and can be found on AdminShare system.

### **First Aiders**

A First Aider is a person who has a valid certificate in either first aid at work or emergency first aid at work training.

First Aiders training will be refreshed every three years by undertaking the two day First Aid at Work requalification. (This may be taken up to 3 months before / 28 days after the expiry date on the certificate).

First aid personnel will be provided with refresher training at regular intervals to keep their skills up to date.

The number of first aiders required will be determined by completing a risk assessment. The HSE provide some general guidance on the number of first aiders required and expected provision is illustrated below:

The numbers of first aid personnel will be determined by individual circumstances, the level of risk and in line with current government guidance.

### **Additional First Aid Provision**

In addition to the above in higher risk areas such as science, D&T, PE etc. at least one person will be trained to a minimum level of emergency first aid.

Adequate first aid provision will include cover for break times.

First aid provision will be available at all times whilst people are present on school premises including out of hours activities. The assessment of need will be reviewed at least annually.

### **First Aid Boxes**

First aid kits, clearly marked, will be provided in the school office and other readily accessible locations and be made known to all staff and pupils.

Additional first aid boxes will be provided on sports fields and for offsite visits.

First aid containers will also be available within specific curriculum areas where an increased risk exists e.g. Design and Technology workshops.

Travel first aid boxes will be kept in minibuses.

First aid boxes will contain a sufficient quantity of suitable first aid materials and nothing else.

First aid does not include the administration of medicines and thus first aid boxes should NOT contain drugs of any kind including aspirin, paracetamol, antiseptic creams etc.

First aid boxes should be located near to hand washing facilities as far as possible.

All first aid boxes will be checked regularly and maintained by a designated member of staff, items should not be used after expiry date shown on packaging. Extra stock will be kept in the school.

Suitable protective clothing and equipment such as disposable gloves (e.g. vinyl or powder free, low protein latex CE marked) and aprons will be provided near the first aid materials.

Blunt-ended stainless steel scissors (minimum length 12.7 cm) will be kept where there is a possibility that clothing might have to be cut away. These should be kept along with items of protective clothing and equipment.

Small quantities of contaminated waste (soiled or used first aid dressings) can be safely disposed of via the usual refuse collection arrangements. Waste should be double bagged in plastic and sealed by knotting.

### **First Aid Rooms**

The first aid room, where provided, is equipped with a sink.

## **First Aid Information**

Notices are posted in conspicuous positions within a school, giving the location of first aid equipment and facilities and the name(s) and location(s) of the first aid personnel.

New and temporary employees are to be told of the location of first-aid equipment and first aid personnel, and facilities on the first day they join the school as part of the induction training.

## **First Aid Records**

The school ensures that the following records are available:

- certification of training for all first-aiders and refresher periods
- any specialised instruction received by first-aiders or staff (e.g. Epi-pens)
- first aid cases treated (see accident / incident reporting).

## **Guidelines on Responding to Injuries**

### **Minor injuries**

The following injuries are considered minor and capable of being dealt with by a first aider in school: grazes, small scratches, bumps, minor bruising, minor scalding or burns resulting in slight redness to the skin.

Injuries requiring medical attention:

- deep cut
- long cuts, which are considered to be approximately 2.5cm when on the hand or foot and 5cm when elsewhere on the body
- the cut is jagged
- the injury involved a pet, especially a cat
- the injury involved a wild animal
- the injury is due to a bite, either human or animal
- the wound has debris stuck in it after cleansing
- the wound is bleeding heavily
- the wound will not stop bleeding after applying direct pressure for 10 minutes
- the injury is a puncture wound.

### **Head injuries**

Injuries to the head need to be treated with particular care. Where symptoms indicating serious injury are NOT present, head injury cards are to be given to the injured party by the first aider attending to take home with them. Any evidence of following symptoms may indicate serious injury and an ambulance must be called:

- unconsciousness, or lack of full consciousness (i.e. difficulty keeping eyes open)
- confusion
- strange or unusual behaviour – such as sudden aggression
- any problems with memory
- persistent Headache
- disorientation, double vision, slurred speech or other malfunction of the senses
- nausea and vomiting
- unequal pupil size
- pale yellow fluid or watery blood coming from ears or nose
- bleeding from scalp that cannot quickly be stopped
- loss of balance
- loss of feeling in any part of body
- general weakness
- seizure or fit.

## **Hospital Admission**

Where a pupil is required to attend hospital using an ambulance and their parents are unable to attend hospital promptly, a member of staff should go to the hospital..

In the exceptional circumstance of parental permission being required, and the parent is unobtainable, a member of staff can act in loco parentis.

If a child is taken directly to hospital they will be accompanied by a member of staff who will stay with the pupil until discharged or until a handover can be made to a parent or guardian.

The member of staff at the hospital must update the senior teacher on the condition of the injured pupil as and when information is made available.

The parent/guardian of a pupil attending hospital must be advised at the earliest opportunity.

Support for the injured pupil and their parents will be provided as determined by the individual circumstances of the incident.

## **Blood and Body Fluid Spillages**

It is important that spillages of blood, faeces, vomit or other body fluids are dealt with immediately as they pose a risk of transmission of infection and disease, e.g. Blood borne viruses and diarrhoeal and vomiting illnesses, such as norovirus.

A spillage kit is available in the school to deal with blood and body fluid spillages, the kit is located in the The School Office.

The person responsible for checking and replenishing the kit regularly is the The Health and Safety Officer.

## **General principles of blood and body fluid spillage management**

Body fluid spillages should be dealt with as soon as possible with ventilation of the area. Anyone not involved with the cleaning of the spillage should be kept away from the area and protective clothing should be worn when dealing with the spillage such as gloves and aprons.

## **Spillage Procedure**

Cordon off the area where the spillage has occurred.

Cuts and abrasions on any areas of the skin should be covered with a waterproof dressing. Use personal protective equipment and clothing to protect body and clothes: disposable gloves and apron must be worn.

**Hard surfaces e.g. floor tiles, impervious table tops.**

Small spills or splashes of blood: Clean with neutral detergent and hot water.

## **Large spills**

- remove spillage as much as possible using absorbent paper towels

- flush these down toilet or dispose of carefully in waste bag
- cover remaining with paper towels soaked in diluted bleach solution (1:10 dilution with cold water)
- leave for up to 30 minutes, and then clear away.

**Alternatively**, large spills may be covered with granules from the spillage kit for two minutes. Spillage and granules should be carefully removed with paper towels and disposed carefully into a waste bag. Clean area with neutral detergent and hot water.

#### **Soft surfaces and fabrics e.g. carpets and chairs**

- remove the spillage as far as possible using absorbent paper towels
- then clean with a fresh solution of neutral detergent and water • carpets and upholstery can then be cleaned using cleaner of choice
- steam cleaning may be considered.

Contaminated gloves, aprons, paper towels, etc should be carefully disposed of into a leak proof plastic bag, securely tied and placed immediately into the normal external school waste container. Large quantities of contaminated waste should be disposed of in consultation with the local waste authority.

Wash hands after procedure.

As with other all hazardous substances used in school, bleach and disinfectants should be stored, handled and used in accordance with COSHH (Control of Substances Hazardous to Health, 2002) Regulations and the manufacturer's instructions. Product data sheets and safe use instructions should be accessible, along with risk assessments and details of actions required in the event of accidental ingestion, inhalation or contact with skin or eyes.

All chemicals must be stored in their original containers, in a cool, dry, well-ventilated place that is lockable and inaccessible to children, visitors and the public.

Appropriate protective clothing (e.g. gloves and aprons) should be worn when handling bleach and other chemical disinfectants. Contact with skin, eyes and mouth should be avoided.

## **Mental Health First Aiders**

The school has also appointed mental health first aiders. Mental health first aiders are qualified personnel who have received training in dealing with mental health issues employees may have. Having mental health first aiders raises employees' awareness of mental ill-health conditions, including signs and symptoms. Those trained have a better understanding of where to find information and professional support and are more confident in helping individuals experiencing mental ill-health or a crisis. They will be identified on the signage for physical first aiders and will have the same access to refresher training and facilities.

## **Hazardous Substances (COSHH)**

All reasonable steps will be taken to ensure all exposure of employees and pupils to substances hazardous to health is prevented or at least controlled to within statutory limits.

The school will implement the following:

- an inventory of all substances hazardous to health kept or present on site will be maintained and copies of relevant hazard data sheets retained
- competent persons will be appointed to carry out risk assessments of the exposure to substances hazardous to health and advise on their control
- all operations which involve, or may involve, exposure to substances hazardous to health will be assessed and appropriate control measures will be taken if elimination or substitution of the substance is not possible
- engineering controls will be properly maintained by planned preventive maintenance and annual performance monitoring to ensure continued effectiveness
- systems of work will be reviewed at suitable intervals and revised if necessary
- all members of staff and others who may work in the affected areas will be informed of the purpose and safe operation of all engineering controls
- personal protective equipment (PPE) will only be used as a last resort or as a back-up measure during testing or modification of other controls
- the type and use of PPE will be carefully assessed and maintained according to manufacturers' instructions
- assessments will be reviewed periodically or if changes to the operation or any hazardous substances used
- qualified professionals, where necessary, will carry out health surveillance
- employee health records of all exposures to substances hazardous to health will be kept for a minimum of 40 years
- all staff and (where necessary) pupils will be provided with understandable information and appropriate training on the nature of the hazardous substances they work with. Staff will be informed about any monitoring and health surveillance results
- all changes to control measures and changes of PPE will be properly assessed and no new substances will be introduced into the school without prior assessment.

## Substances Hazardous to Health

Substances hazardous to health as defined by the COSHH regulations are:

- a) substances classified as toxic, corrosive, a health hazard, a serious health hazard, flammable, oxidising, explosive, harmful to the environment or gases under pressure. These can be identified by their warning label and carry the pictograms detailed below

- b) Biological agents directly connected with work including micro-organisms
- c) Dust of any kind when present as a substantial concentration in the air
- d) Substances which have a Workplace Exposure Limit (WEL) assigned to them by the Health and Safety Commission document EH40
- e) Any other substance not specified above which may create a comparable hazard to a person's health

## **Principles of Control**

Exposure to substances hazardous to health should either be prevented altogether, substituted with a less harmful substance, or (where it is not reasonably practicable) adequately controlled.

In all cases personal protective equipment (PPE) should only be used where it is not reasonably practicable to adequately control exposure by other means. For example, fume cupboards in science labs and local exhaust ventilation systems on woodworking machinery should always take precedence over masks.

If a substance is hazardous by inhalation it is likely to have been assigned a "workplace exposure limit" (WEL). This should be used to assess the level of control.

Where PPE is identified as necessary for use by staff and pupils it should be ensured it is suitable for the purpose.

Employees have a duty to make full and proper use of all control measures identified as required in the risk assessment and must wear appropriate PPE (lab coat, eye protection, gloves etc.) where this is identified as required. Adequate information and training must be provided on its use and maintenance.

## **Maintenance, Examination and Testing**

Where controls such as fume cupboards, dust extraction for wood working equipment etc are provided it is necessary to ensure that they are properly maintained. This will require visual and operational checks pre use in addition to a thorough examination and tests of engineering controls.

In the case of local exhaust ventilation, tests for fume cupboards, woodworking extraction etc. should be carried out at least every fourteen months. A record of the results of all examinations must be kept for at least 5 years.

All PPE must be kept clean, in good repair and stored correctly to prevent contamination.

## **Health Surveillance**

Health surveillance is typically only required in certain circumstances and is dependent on individual circumstances. Where there is a reasonable likelihood that an identifiable disease or adverse health effect associated with exposure will occur and the risk assessment shows that health surveillance is appropriate for the protection of employees these should be carried out.

Monitoring and health surveillance records relating to named individuals must be kept for 40 years.

## **Information, Instruction and Training**

Information, instruction and training must be given to employees and pupils who may be exposed, about the risks to health and precautions.

## **Infection Control**

School staff and pupils are from time to time at risk of infection or of spreading infection.

The school aims to minimise the risk of the spread of infection and will:

- provide employees with information on potential infections and symptoms measures to assist with early identification and prompt implementation of control measures
- inform and take advice from the local Consultant in Local Disease Control (CCDC) and the Environmental Health Department of the Local Authority if an increase in illness is noted in school, or if they have any concerns about infectious disease issues
- maintain up-to-date emergency contact numbers for all pupils, not only so that parents can be contacted if children are ill and need to be taken home, but also to assist in the investigation of any outbreaks
- maintain high standards of hygiene throughout the school including the promotion of good hand washing
- provide warm water, liquid soap and disposable towels in all toilets and cloakrooms
- undertake risk assessments to include the infection control risk and identify control measures associated with farm or other similar visits
- ensure spillages of bodily fluids (blood, urine, vomit and faeces) are dealt with immediately and that adequate facilities are provided to provide protection to people involved
- organise for the safe cleaning of equipment and where appropriate disinfection and thorough, cleaning of the premises
- arrange for safe disposal of any infected materials.

### **Further Information**

The Health Protection Agency (HPA) provides details on recommended exclusion periods for the more common communicable diseases in Guidance on Infection Control in Schools.

Factsheets on infectious diseases are available from the Health Protection Agency <http://www.hpa.org.uk/Publications/InfectiousDiseases/Factsheets/>.

## **Staff Illness and Reporting**

Staff should notify their manager if they develop any of the following infectious diseases or symptoms:

- skin infections or exposed areas of infestation
- severe respiratory infection (e.g. pneumonia, TB)
- severe diarrhoea
- jaundice
- hepatitis
- Chicken Pox, Measles, Mumps, Rubella
- norovirus
- gastroenteritis
- HIV
- Weil's Disease.

Individual suitable controls will need to be applied dependant on the circumstances of each case. In some instances employees may need to be referred to an Occupational Health Practitioner or their GP for advice.

Staff should report diseases including Leptospirosis, Hepatitis, TB, and Tetanus which have been contracted through work as these are reportable under RIDDOR (Reporting of Injuries, Diseases and Dangerous Occurrences Regulations).

### **Confidentiality**

Confidentiality will be maintained at all times in relation to an employee who is known to have any infectious disease.

No health information will be disclosed without the written consent of the employee concerned and any breach of such confidentiality, either inside or outside the school, will be regarded as a disciplinary offence and may result in disciplinary action.

## **Pandemics and Epidemics**

When notified that the country is experiencing a pandemic or epidemic, the school will aim to prevent the spread of infection through work-based activities by adopting suitable control measures.

The school will:

- follow guidance given by government agencies and close sites if instructed to, or if staff, pupils or any other person is put at risk,
- undertake risk assessments to identify tasks or situations that may expose individuals or groups to potential risks,
- monitor any changes to government guidance,
- manage the risk posed by contractors and visitors visiting the school,
- develop and implement an emergency action plan to deal with any potential outbreaks,
- allow staff to take part in any government testing,
- identify, plan and implement controls and safe systems of work to prevent transmission,
- provide information, instruction and training to those identified at risk,
- where required, provide personal protective equipment (PPE) and monitor its use and maintenance,
- organise for the safe cleaning of equipment and, where appropriate, disinfection and thorough cleaning,
- arrange for safe disposal of any infected materials, and
- adopt good hygiene practices.

## Smartboards

All reasonable steps will be taken by the school to secure the health and safety of employees and pupils when smartboards are used. All new boards are smart boards rather than projector

To achieve this objective the school will:

- prior to the installation of any new whiteboard a risk assessment will be completed to cover the positioning of the projector and the exposure to intense light
- try to ensure that projectors are located out of the sight line from the screen to the classroom; to ensure that, when teachers look at the class, they do not also have to stare at the projector lamp. (The best way to achieve this is by ceiling-mounting rather than floor or table-mounting the projector)
- ensure that pupils are adequately supervised when they are asked to point out something on the screen
- provide a stick or laser pointer to avoid the need for the user to enter the beam is recommended
- provide adequate information and training to persons working with interactive whiteboards especially in relation to beam viewing by teachers and pupils.

## Guidance for Users

- teachers and pupils should avoid staring into the projector beam at all times
- try to keep your back to the beam as much as possible
- use the stick or laser pointer provided whenever possible.

## **Legionnaires Disease**

All reasonable steps will be taken to identify potential legionellosis hazards and to prevent or minimise the risk of exposure.

The school will:

- carry out a Legionellosis Risk Assessment
- prepare a written scheme/plan for preventing or controlling the risk of Legionella • implement and manage the scheme/plan
- keep records for a minimum of 5 years.

Day to day responsibility for monitoring and ensuring that the systems are being correctly operated lies with the Bursar.

At risk systems include the hot and cold water storage and distribution system.

To achieve control of legionella bacteria the school will implement the following:

### **Avoidance of Conditions Favouring Growth of Organisms**

As far as practicable, water systems will be operated at temperatures that do not favour the growth of legionella. The recommended temperature for hot water is 60°C and either above 50°C or below 20°C for distribution, as care must be taken to protect people from exposure to very hot water.

The use of materials that may provide nutrients for microbial growth will be avoided. Corrosion, scale deposition and build up of bio films and sediments will be controlled and tanks will be lidded.

### **Monitoring and recording**

Temperatures of water outlets will be checked and recorded to ensure temperature controls to prevent bacterial growth are maintained.

The School has a contract with Eaton Environmental Services who do our risk assessment and quarterly temperature checks.

### **Disinfection**

Periodic disinfection of shower heads will take place to remove any scale and bacteria.

## **Emergency procedures**

Emergency procedures will be established for the discovery of Legionella bacteria. If during routine sampling/inspection of hot and cold water systems Legionella bacteria is discovered in any systems likely to provide a medium for the spread of infection (e.g. water aerosol spraying equipment) these will be shut down and the situation reported immediately to the Bursar.

## **Training**

The school will provide training to the Bursar responsible for the day to day management of the water systems.

## **Lifts**

All reasonable steps will be taken to maintain all lifts throughout the school.

## **Implementation**

The school will ensure that:

- an examination scheme is drawn up by a competent person for each lift
- all lifts are fitted with appropriate barriers and interlocking gates to prevent passengers or cargo from falling from the lift, coming into contact with the lift machinery or entering/exiting the lift when it is not at a designated landing
- suitable equipment and mechanisms are installed to prevent the lift from:
  - leaving its landing when the doors are unlocked and/or open
  - falling (including its maximum working load) in the event of a failure in the lifting mechanism
  - overrunning its furthest intended point of travel or being operated from more than one position at any one time
  - being overloaded or exceeding its maximum number of passengers.
- lifts are maintained in a safe condition and examined/inspected by competent persons (annually for goods lifts and 6 monthly if lifting people)
- the safe working load (SWL) is clearly displayed inside each lift
- notices are posted adjacent to each lift opening advising against the use of a lift in the event of a fire
- arrangements are made for the emergency evacuation of persons in the event of lift failure
- lift motor rooms are kept locked and entry only allowed to authorised persons.

## **Records**

All thorough examination reports will be kept for a minimum of 2 years

## **Lone Working**

This Policy on lone working relates to any individual who spends some or all of their working hours working alone without direct supervision and who does not have someone close at hand to assist them in the case of an incident.

Lone working increases the health and safety risks to individuals because they may not be able to summon assistance in the event of an incident and any delay may in receiving attention may increase the consequences of any injury.

People falling into this category may include:

- anyone working outside normal hours on their own
- cleaners who normally work outside school hours
- teachers in classrooms away from the main building
- teachers working in workshops or laboratories
- caretakers or maintenance staff
- employees who open up or close the building on their own.

It is acceptable for people to work alone so long as the school has completed a risk assessment and any measures deemed necessary have been put into place.

People who are not lone workers:

- teachers or others working alone in a classroom or office in the main school buildings when the school is open.

Some activities should not be carried out by people working alone and each school should identify those that are relevant to them, typically this may include:

- working at height on ladders or tower scaffolds
- use of high risk chemicals
- use of high risk machinery
- electrical work
- entry to areas of restricted or limited access or exit.

### **Key Actions**

- identify all workers who work alone
- Identify all locations where lone working is carried out
- Complete a risk assessment for all lone working
- Control measures to be identified, prioritised and implemented
- Higher risk activities/area identified and formal decisions made on authorisation of lone working
- Formal systems/procedures developed for particular activities/areas as required.

### **Requirements of lone workers**

It is important that lone workers are considered for any known medical conditions which may make them unsuitable for working alone. Consideration should be given to routine work and foreseeable emergencies which may impose additional or specific risks.

Lone workers must be suitably experienced, have suitable instructions and if necessary, training on the risks they are exposed to and the precautions to be used.

The school shall ensure adequate supervision is provided. The adequacy of the supervision will depend on the level of the risk, types and duration of exposure. Adequacy of supervision may involve some of the following:

- a) periodic checks on lone workers i.e. visual
- b) periodic contact with lone worker i.e. telephone
- c) general or specific alarms for emergencies
- d) checks on lone workers to ensure they have returned to the school on completion of extracurricular activities.

### **Rules for Lone Workers**

- Anyone working alone must have access to a telephone and ensure that a relative or colleague is aware
- The Deputy Head or Bursar must be informed of anyone intending to work late and a satisfactory arrangement made for locking up the building
- When the Deputy Head or Bursar is not present all lone workers, for reasons of security, health and safety, should lock themselves in the building
- Staff must not place themselves in danger by challenging intruders or vandals but should call the police for assistance
- Staff working alone have a responsibility for making themselves familiar with and following the school's safety procedures and location of safety equipment
- If staff rely on mobile phones they must ensure that their network has good reception within school. Although phones can give extra reassurance, they do not provide complete protection and staff should still be alert for their own personal safety at all times
- In the situation where two or more people are working in isolated areas of an otherwise unoccupied building, personnel should keep each other informed about their movements.

## **Opening/Closing the School**

When the last person has left the building and notified the Deputy Head(or other named person), they should then secure the building. This includes the closing of all fire doors and leaving on any emergency and exterior lights.

When the caretaker (or other named person) arrives in the morning he must make a quick examination of the exterior of the building to make sure that there are no signs of a break-in or of anyone having been in the building. If the caretaker is in any doubt he should contact the Police/security firm and should never enter the building if he is unsure of his safety.

## **Emergency Considerations**

Lone workers should be capable of responding correctly to emergencies. Risk assessment should identify foreseeable events. Emergency procedures should be established and the people concerned trained in using the procedures.

Emergency Procedures may need to cover:

- fires resulting from the process or work being undertaken
- if a person has an accident what needs to be done to recover them, especially important in laboratories
- actions to be taken in case of a chemical spill
- actions to be taken in the event of power failure (for example where the person is reliant on power for their safety systems or for egress from a building e.g. power operated doors).

## **Manual Handling**

This guidance is applicable to all employees of, and workers for the school who undertake manual handling activities.

Manual handling means: the transporting or supporting of a load by hand or by bodily force including lifting, putting down, carrying, pushing or pulling.

A load can include a person or animal as well as inanimate objects but not an implement, tool or equipment while in use for its intended person.

Typical manual handling tasks in school are:

- moving tables and chairs
- carrying piles of books or stationery
- putting out PE equipment
- maintenance activities
- receiving and putting away food and other deliveries
- setting up temporary stages
- general movement of workplace equipment

To prevent injuries and long term ill-health from manual handling the school will ensure that activities which involve manual handling are eliminated, so far as is reasonably practicable. Where it is not practical the school will carry out an assessment to determine what control measures are required to reduce the risk to an acceptable level.

To implement this policy the school will ensure that:

- there is no lifting wherever possible and in relation to the handling of pupils with special needs, this policy is intended to promote a safer handling approach, which means no manual lifting of the whole or a substantial part of a person's body weight
- manual handling assessments are carried out for activities that:
  - a) pose a foreseeable risk of injury
  - b) cannot be avoided
  - c) cannot be mechanised and consider the risks to pupils and employees.
- adequate information and training is provided to persons carrying out manual handling activities including details of the approximate weights of loads to be handled and objects with an uneven weight distribution, where appropriate
- any injuries or incidents relating to manual handling are investigated, with remedial action taken
- employees are properly supervised
- where relevant, employees undertaking manual handling activities are suitably screened for reasons of health and safety, before doing the work

- special arrangements are made for individuals with health conditions which could be adversely affected by manual handling operations
- wherever possible, the school will conduct the risk assessments of pupils with special needs before they attend and the school should seek to receive information on pupils in advance.

### **Reducing the risk of injury**

In considering the most appropriate controls, an ergonomic approach to designing the manual handling operation will optimise the health, safety and productivity associated with the task.

Techniques of risk reduction will include:

- mechanical assistance
- redesigning the task
- reducing risk factors arising from the load
  - improvements in the work environment
- employee selection.

No employee will be required to lift any item that they do not feel confident of doing without risking personal injury.

## **Moving and Handling People**

There are occasions when a pupil with medical needs requires assistance in moving. While the basics outlined above still apply, there are other considerations. When a move is essential and the person requires help, then their co-operation should be sought where possible. The move should be explained to them so that they can actively participate in it.

Whenever a pupil with physical disabilities needs regular support in standard moves such as from a wheel chair to toilet or a seat or vehicle, then a full risk assessment must be written up. Clear instructions covering each activity should be included, so that all staff members who are involved in the task may move the person safely and in the same manner. Ancillary equipment such as hoists, sliding boards, swivel plates, etc. must all be used in the correct manner and staff must have received appropriate training in the use of the equipment.

The risk assessment should consider both routine manual handling and emergency situations when manual-handling procedures may have to be adapted (e.g. evacuation in the event of a fire). The risk assessment will help inform the procedures for that pupil's needs. Procedures should be developed with the pupil or their representatives. An individual's needs might vary day-to-day and even during the course of a day.

Schools should endeavour to ensure employees adopt the same handling techniques when assisting pupils with moving and handling to ensure a consistent and safe approach. This will help to keep the pupil calm and reduce the risk of struggling, sudden movement or violence.

The expert advice of external medical professionals should be considered where complex moving and handling problems of pupils are presented.

### **Key Actions**

- Heads of Departments to identify and list tasks with a potential to cause injury
- complete a manual handling risk assessment for each task
- Bring the assessment to the attention of relevant staff and pupils, where relevant
- Provide manual handling information and where required training for staff and pupils
- Supervise tasks to ensure safe lifting and handling
- Review assessments at least annually
- Complete risk assessments for pupils with special needs before they enter school.

## Minibus

### SCHOOL MINIBUS DRIVERS - POLICY AND PROCEDURES

#### Legal Requirements

The law requires that a minibus must:

- be correctly licensed
- be adequately insured
- be well maintained
- have a valid MOT certificate (if more than one year old).

The school will ensure that appropriate safety procedures are established for the minibus in line with the ROSPA Advice for Minibus Safety and their code of practice. A copy of the full code of practice is available at [www.rospa.com](http://www.rospa.com).

**The following drivers have to take a PCV test including medical, multiple choice test and practical driving exams.**

Drivers whose licence was first issued **on or after 1<sup>st</sup> January 1997**

Do not have automatic D1 entitlement on their existing car driver's license to drive a minibus of over 8 seats. They must take a separate PCV test to allow them to do so, or they will be uninsured.

**The following drivers have grandfather rights under their existing car license to drive minibuses.**

Drivers whose licence was first issued **before 1<sup>st</sup> January 1997**

Can drive minibuses under their existing car license shown as group A (B for automatics) on an old style licence or as category B and D1 101 (*not for hire or reward*) on a new style licence) entitles the holder to also drive a minibus if

- Driver is 21 or over
- Minibus has a maximum of 17 seats including driver's
- It is not being used for hire or reward – if it was, would normally need PCV entitlement (**see S19 scheme below for exceptions**)

Note that when such a driving licence comes up for renewal, the minibus entitlement D1 will not automatically be renewed – a special application needs to be made which involves meeting higher medical standards.

## **S19 Minibus Permits**

**These must be displayed in all school minibuses.**

Issued to organisations, on application, concerned with **education**, religion, social welfare, recreation or other activities of benefit to the community. Such a permit allows:

### ***Making a charge for use of the bus***

Permit holding organisations can make a charge for the use of the bus if the service is provided for their own members or for groups of people whom the organisation serves (eg pupils). The service **must not be provided to members of the public**, and charges must be made on a not for profit basis (see below re paid minibus drivers)

### **Drivers with a licence first issued on or after 1/1/97**

With a permit, drivers who first held a licence to drive cars after 1/1/97 (ie with no automatic D1 entitlement) **can drive buses covered by S19 permits if**

- They have taken and passed a PCV test. Have gone through the process to get D1 added onto their license.
- It is being driven on behalf of the school for social purposes
- Driver is 21 or over
- Driver has held a car (category B) licence for at least 2 years
- Service is being provided on a voluntary basis
- Minibus has a maximum of 17 seats including driver's

Note that when driving a minibus under these conditions:

- It must be driven within the UK; and
- A trailer must not be towed.

### ***Paid minibus drivers***

Bus drivers can be paid for driving the minibus under the S19 permit if they hold a **full PCV licence or**

- Their licence was first issued before 1/1/97 ; **and**
- They have the D1 101 entitlement

## **SCHOOL POLICY**

All staff driving a school vehicle (including private use) or using a private vehicle on school business are required to provide certain information as detailed below.

### **Driving a school vehicle:**

- The 'check code' for the school to check their license on the DVLA website. [www.gov.uk/view-driving-licence](http://www.gov.uk/view-driving-licence). This will be requested annually and can be obtained by entering their Driving License number and NI number into the section of the DVLA website entitled 'view or share your driving license information';
- Details of any motoring convictions or future prosecutions pending for any motoring offence (other than fixed penalty parking fines) as these occur;
- The driver must have no more than 6 penalty points. If a driver has less than 6 points, the driver may still be precluded if the points are for dangerous driving.
- 
- Details of any medical condition/s that might affect their ability to drive safely as these occur.

**Driving a Private Vehicle:**

As for driving a school vehicle (see above). In addition, staff are required to sign an annual declaration (Appendix 1) to confirm they:

- Have current car tax
- Have a valid MOT certificate (if applicable)
- Have adequate insurance and if appropriate add business use to their own private policy
- No-one under 21 will be allowed to drive any of the School's minibuses under any circumstances. Also must have held a driving license for a minimum of 12 months and hold relevant entitlements.
- Those whom passed their test prior to 1 January 1997 will have categories D1 on their license, which entitles them to drive a minibus with a maximum of 17 seats including the driver and providing it is not being used for hire and reward (there may be other restrictions on individual licenses)
- Those who passed their test after 1 January 1997 do not have this entitlement and must obtain a Passenger Carrying vehicle License (PCV) in order to drive a minibus.
- The driver must have no more than 6 penalty points. If a driver has less than 6 points, the driver may still be precluded if the points are for dangerous driving.
- 

To comply with the above, the school has gone further in its quest to ensure that pupils are driven in safety.

Prior to transporting pupils for the first time, all drivers will be given the opportunity of a vehicle familiarisation session to include:

- daily vehicle checks
- pre-journey checks
- general driving safety
- road testing
- emergency stop
- use of mirrors and indicators
- reversing using mirrors only
- passenger safety
- passenger comfort.

All new drivers will be added to the list of authorised minibus drivers.

**Additionally:**

- The School reserves the right to carry out spot checks on driving licences at any time
- It is entirely at the School's discretion whether a member of staff will be permitted to drive any of the School's minibuses.
- To drive a school minibus with children on board, members of staff must have undertaken an assessment carried out by an independent assessor appointed by the School. This will be operated on the same lines as the Hertfordshire Road Safety Unit's assessments, which are compulsory for drivers of HCC minibuses.
- The permit issued following successful completion of such an assessment will remain valid for a maximum of 5 years, but members of staff may be required to undergo a re-assessment earlier than this at the school's discretion.
- Before and after each trip in the minibus, drivers must run through the Daily Checklist kept within each bus, and report any problems encountered or damage incurred (internal or external) to the Bursar immediately after the trip.

**Drivers Hours**

It is the school's policy that if there is a trip which involves a driver being in charge on an extended day, then a second adult should accompany the party and that person should be competent to share the driving to reduce the possibility of driver fatigue. An extended day is anything beyond 7.00 pm when the teacher started work at 8.45 am. This requirement is non-negotiable.

## Driver's Responsibilities

Whilst the school will ensure a weekly check of the condition of the minibuses, drivers are responsible for the following checks before embarking on their trips:

- do a visual inspection of the minibuses which includes tyre pressure checks and that the windscreen and glass is clean and can be seen through
- check brakes to see that they are functioning correctly
- ensure that mirrors and seat are in the correct driving position
- check that all lights are functioning correctly
- Ensure that all seat belts are being worn. This includes all passengers, who must wear a seat belt
- ensure that the windscreen washer system works and that wipers are functioning correctly
- ensure that the vehicle is correctly loaded and that no more than sixteen passengers are being carried
- emergency exits must not be blocked
- ensure that all doors are correctly closed
- check that you have enough fuel for your journey
- as soon as possible after moving off, the driver should carry out a running brake test and at the same time, check the operation of the seat belts
- at intervals throughout the journey, all instruments and warning lights should be checked and necessary action taken if a fault is indicated
- ensure that food and drink are not consumed on the vehicle
- make sure that no rubbish is left on the vehicle and ensure that no malicious damage has occurred to the interior of the vehicle.

At the end of the journey the driver must lock and make the vehicle secure. Keys should only be taken just prior to making use of the minibuses. The keys should be returned immediately after use.

## **Passenger Responsibilities**

- must wear seat belts and always remain in their seats until instructed otherwise
- must never distract the driver by shouting, etc
- pupils should not eat or drink on the vehicle
- must make sure that escape routes are not blocked by bags, etc
- pupils are ambassadors of the academy and must never bring its name into disrepute by gesturing, etc
- passengers found to have vandalised the minibuses may face a ban from using it again and be required to pay for damages.

## **Accident Procedures**

If an accident occurs and any personal injury or damage to third party property is involved, then the driver must stop. He/she must be prepared to give his name and address and details of the owner of the vehicle to a Police Officer or any other person having reasonable grounds to ask. If for any reason the driver is not able to give these details then he/she must report in person to a Police Station as soon as practically possible, otherwise an offence is committed, and in any event not later than twenty-four hours afterwards.

Report the accident immediately to the school and complete the appropriate forms for onward transmission to our insurers.

## **Breakdown and Recovery**

The minibuses are covered for breakdown and recovery. Details of how to contact the providers and our membership numbers are in the minibus.

## **First Aid**

All minibuses contain first aid boxes which are checked at the end of each term. The contents of these boxes include:

- antiseptic wipes
- bandages
- assorted adhesive dressings
- plasters
- eye pads
- Scissors.

Any use of the first aid kit must be reported as soon as possible thereby maintaining a full kit at all times.

**Minibuses must not be used for private use without express permission from Bursar.**

## **Weekly Checks**

Weekly checks of the minibuses will be carried out and recorded by the Transport Manager.

Staff who notice any defects in the minibuses should immediately notify the Transport Manager who will then determine whether or not the vehicle should be taken off the road and repairs carried out.

The minibuses are serviced in line with the manufacturers recommendations.

### **Incorrect Use of the Minibuses**

A driver who breaks the speed limit will be responsible for paying his/her own fines. Similarly fines imposed for incorrect car parking or negligent driving will be the responsibility of the driver. Any damage caused to the minibuses through incorrect use, may result in the driver being asked to contribute fully or partially to any excess payable by the academy.

### **Speed Limits**

The speed limit for minibuses is as follows:

- 30 mph not 40 mph on urban carriageways 50 mph not 60 mph on single carriageways
- The minibuses are limited to 62 mph.

### **List of Authorised Drivers**

The school will keep a list of drivers who have been authorised to drive the minibuses.

Authorisation may be withdrawn at any time by the Headmaster. Any member of staff who has been advised not to drive their own vehicle for medical reasons must advise the school immediately.

## **New and Expectant Mothers**

The school recognises that the general precautions taken to protect the health and safety of the workforce as a whole may not in all cases protect new and expectant mothers and there may be occasions when, due to their condition, different and/or additional measures will be necessary.

To implement effective measures for new and expectant mothers the school will ensure that:

- employees are instructed at induction to inform their manager of their condition at the earliest possible opportunity and that the highest level of confidentiality is maintained at all times
- risk assessments are carried out for all work activities undertaken by new and expectant mothers and associated records and documentation maintained
- new and expectant mothers are not allowed to work with chemicals of a mutagenic/teratogenic classification
- necessary control measures identified by the risk assessment are implemented, followed, monitored, reviewed and, if necessary, revised
- new and expectant mothers are informed of any risks to them and/or their child and the controls measures taken to protect them
- any adverse incidents are immediately reported and investigated
- appropriate training etc is provided where suitable alternative work is offered and accepted
- provision is made to support new and expectant mothers who need to take time off work for medical reasons associated with their condition
- where relevant a suitable rest area is provided to enable the new or expectant mother to rest in a degree of privacy and calm
- where risks cannot be eliminated or reduced to an acceptable level then consideration will be given to adjusting working conditions and/or hours or if necessary providing suitable alternative work or suspension with pay.

## **Outdoor Play Equipment**

### **Safe use of equipment**

#### **Supervision**

Children must be supervised at all times whilst using outdoor play equipment and the appropriate number of people required to supervise play areas must be determined for each location.

Supervising staff should be familiar with the equipment, the rules for use and of the ability of the children.

#### **General guidelines**

- Staff/line managers on duty must ensure that outdoor play equipment is visible and can be appropriately supervised when in use.
- Staff/line managers on duty have a responsibility to make regular checks for defects and report them as appropriate.
- Staff/line managers have a responsibility to ensure appropriate behaviour policy.
- Consideration needs to be given to weather conditions, outdoor play equipment should not be used during wet or icy conditions.
- Apparatus must only be used at appropriate times when supervised. Parents need to be informed that the apparatus is for school aged children only and not to be used before and after school.

#### **Clothing/Footwear**

Suitable clothing should be worn. Hazards can arise from - unfastened coats, woollen gloves, scarves, ties, etc.

Appropriate footwear must be worn. Hazards arise from - slippery soles, open toed and sling back sandals, heels and untied laces, etc.

#### **Zoning of Activities**

Consideration will be given to the range of activities occurring within the playground area:

- Ball games/chasing games to be sited away from the climbing area.
- In a nursery garden, wheeled toys in particular, are to be used away from the climbing area.

## **Play equipment standards**

All new outdoor play equipment to be designed, constructed, installed and maintained in accordance with European standards BS EN 1176 and BS EN 1177.

These European standards are not retrospective or a legal requirement but represent good practice in the event of an accident claim. Play equipment which was considered safe under BS 5696 will still be safe under the new standards.

The independent competent person carrying out annual inspection and maintenance will advise whether any alterations need to be made.

Only manufacturers/contractors with appropriate play industries registration will be used to install new outdoor play equipment. Schools will check that companies have API (Association of Play Industries) or BSI registration for equipment manufacture and installation.

Scrambling and climbing elements must not exceed 3 metres, for children below 5 years the height should be a maximum of 1.6 metres.

Height should not be the dominant feature on any item of equipment. Interest challenge and enjoyment should be achieved without the need for height itself.

Structures must be spaced clear of each other to prevent one activity interfering with another, they must also be clear of walls, fences etc.

Suppliers of new equipment will be required to supply information relating to surfacing requirements, intended age range, risk assessment, installation instructions, servicing and maintenance instructions.

## **Safety surfaces**

All products must meet the appropriate BS EN Standards. Both portable and fixed climbing equipment that has a fall height of 600mm must be on an impact-absorbing surface if used outside. (Fall height is the distance from the clearly intended body support to the impact area).

Although impact absorbing surfaces cannot prevent accidents they may reduce the level of injury. There are a range of surfaces available which provide impact attenuation including rubber mats and tiles, bark etc.

The extent of surfacing around static equipment is dependent on the fall height; this should extend at least 1.75m beyond the outermost points of the base of the frame.

When considering so called safety surfaces their likely effectiveness, durability, practicality and management will be taken into account.

Materials such as top soil and turf do have limited impact absorbing properties.

Where bark is used this area should be a minimum of 300mm deep with a recommended particle size of 38mm max and 12mm min.

Loose materials will spread if not suitably contained and will need to be topped up from time to time, thus it is important to have additional bark available to top up to the original level.

## **Inspection and maintenance**

For new equipment a post installation inspection will be arranged.

BS EN 1176 recommends that all outdoor play equipment be inspected and maintained on a regular basis. Such inspection and maintenance is at 3 levels.

**Level 1 checks** – Daily / pre use checks by staff (these do not require formal recording)

Concentrating on the following points:

- no evidence of obvious wear / damage
- area safe from health hazards e.g. needles, glass, faeces etc
- impact absorbing surfaces no cuts, tears, wear or unstuck areas
- all fastening tightly secured
- no broken chains, stretched links or loose or twisted shackles
- uprights unbroken and firm in the ground.

Where any defects / hazards are identified appropriate steps must be taken to prevent use until problems have been satisfactorily resolved.

**Level 2 checks – termly inspection in house**

A more thorough check of the equipment to be conducted termly and these records kept on site.

**Level 3 checks – annual inspection**

A detailed certified inspection by an independent competent person capable of inspecting to BS EN 1176 and 1177 these checks must be formally recorded and records kept on site.

Such checks ensure safety and identify any improvements required in terms of the European standards.

The competent person conducting the annual inspection will advise on the extent of surfacing required for both static and moving equipment.

## **Personal Protective Equipment**

The school provides personal protective equipment (PPE) when the risk presented by a work activity cannot be eliminated or adequately controlled by other means. When it is provided, it is because health and safety hazards have been identified that require the use of PPE and it is therefore necessary to use it in order to reduce risks to a minimum.

To effectively implement its arrangements for the use of PPE the school will:

- ensure that PPE requirements are identified when carrying out risk assessments
- use the most effective means of controlling risks without the need for PPE whenever possible and only provide PPE where it is necessary
- carry out an assessment to identify suitable PPE
- ensure that if two (or more) items of PPE are used simultaneously, they are compatible and are as effective used together as they are separately
- ensure that PPE is sourced appropriately and bears the “CE” certification mark
- ensure PPE is available to all staff who need to use it
- provide adequate accommodation for correct storage of PPE
- provide adequate maintenance, cleaning and repair of PPE
- inform staff of the risks their work involves and why PPE is required
- instruct and train staff in the safe use and maintenance of PPE
- make arrangements for replacing worn or defective PPE
- review assessments and reassess the need for PPE and its suitability whenever there are significant changes or at least annually.

Staff provided with PPE for their own personal use at work will be required to sign to confirm its receipt.

## **Physical Education**

The school is committed to safe practice in physical education and recognises that the school and the teaching staff and others in positions of responsibility have a duty of care for those in their charge to ensure that planning and implementation include recognition of safety as an important element.

Young people should learn about the principles of safety as applied to themselves and to the care and well being of others. This should be a planned and intentional aspect of the curriculum.

The school follows the standards set out in 'Safe Practice in Physical Education and school Sport' produced by the Association for Physical Education.

### **Implementation**

The Head of PE is responsible for ensuring this policy is brought to the attention of all staff in the Department, for ensuring that it is complied with.

The Head of PE is also responsible for completing an Association for Physical Education (afPE) PE risk assessment form for each PE event where significant health and safety hazards are reasonably foreseeable and for bringing risk assessments to the attention of relevant staff.

### **Staff competence and qualifications**

Teachers with responsibility for the planning and delivery of PE programmes should have satisfactorily completed appropriate initial and/or in-service training which cover all those aspects of activity required to be taught, as recognised by the DfE.

Where there are specific National Governing Body Certificates available for certain sport or activities, teachers planning or supervising these activities should be certificated as appropriate.

Only in exceptional circumstances and with great care should teachers of other subjects who have no specialist training in physical education be time-tabled to teach in the PE department. Those teaching staff should not take full responsibility for any aspect of physical activity where there are elements of hazard and attendant risk. This will include swimming, gymnastics, athletics and throwing events.

### **Supervision of Pupils**

Unqualified teachers will not be required to teach in areas where they lack the appropriate experience and expertise, particularly where there are safety implications. A qualified specialist teacher should closely supervise PE classes. It is not acceptable for non-teaching staff to supervise a practical class on their own.

## **Adults other than Teachers (AOTTs)**

When adults other than teachers are used to support the delivery of physical education and in the extended curriculum to:

- support and work alongside teachers in the delivery of the curriculum
- work alongside and support teachers in the development of school clubs and teams on the school site
- deliver off-site activities.

The school governors continue to have a duty of care that operates for any activity in which pupils are engaged. Teachers cannot transfer this duty and therefore AOTTs must work alongside teachers with supervision.

The school will ensure that stringent checks, including Disclosure and Barring Service (DBS) checks, are made before allowing any unsupervised access to children.

Refer: 'Guidelines for Local Education Authorities, Schools and Colleges' in the use of 'Adults other than Teachers in Physical Education and Sport Programmes', BAALPE.

## **Class sizes in Physical Education**

In determining the size of teaching groups in physical education, account will be taken of:

- nature of the activity
- age, experience and developmental stage of pupils
- requirements of National Curriculum.

## **Risk Assessment**

The school will create and maintain a risk assessment for each PE work area. Significant hazards and their control measures will be included in "schemes of work" as appropriate. All staff working in PE and school sport will be made aware of these findings and be involved in their review.

## **Manual handling and storage of equipment**

Where possible manual handling tasks should be avoided or the risk of handling injury minimised by appropriate task design or the use of handling aids (e.g. trolleys). The layout of storage areas should minimise the need to stretch, reach, bend or twist the body excessively to reach frequently used or heavy items. This can be enhanced by ensuring that storage areas are kept tidy and well organised.

## **Apparatus Handling by Pupils**

It is an integral part of the subject to involve pupils in apparatus handling, particularly in gymnastics. However this must be carried out in such a way as to reduce risk to pupils as far as is reasonably practicable. The school will make arrangements to enable pupils to learn how to handle equipment safely according to their age and strength.

## **Inspection of equipment**

All indoor PE facilities (gymnasiums, halls, sports halls, multi-gyms etc.) and equipment will be inspected termly and records kept.

PE department staff should carry out pre-use visual checks of equipment to identify obvious defects this includes a visual sweep of playing areas prior to use to ensure any hazardous objects are removed.

All games posts will be kept in good condition, with freestanding posts and lighter portable posts secured to prevent them falling over and all posts subject to regular checks.

## **Hazards and equipment defects**

It is the responsibility of everyone in the PE department to inform the teacher in charge of any hazards, e.g. defects to equipment, so that appropriate action can be taken.

If the teacher in charge considers a defect to be a significant threat to health and safety, the equipment must be taken out of action until the defect to the equipment has been remedied and/or the Head of Department agrees it is safe to be used. A notice must be attached to the equipment indicating that it is faulty and must not be used.

## **Emergency procedures**

The Head of Department is responsible for preparing written emergency procedures for activities where there is a risk of serious and imminent danger to employees and/or pupils. Where employees are allocated specific tasks to perform in an emergency their role will be detailed and they will be suitably trained.

## **Away Fixtures**

Such risks could be significant in the case of an injury to pupils during a lesson both on-site and off-site. Effective procedures are complicated by when and where the emergency happens. The school will consider what they will do during away fixtures and matches and agree procedures that will ensure effective handling of the situation.

## **First Aid**

The school will ensure that a suitable numbers of trained first aiders are available.

A travelling first aid kit and clear, effective procedures for contacting the emergency services is considered to be the minimum requirement.

Procedures to address the needs of injured pupils and the remainder of the group away from school premises and the managing accidents will be included in PE risk assessments.

## **Clothing and Footwear**

This must be appropriate to the activity.

Suitable footwear must be worn on all occasions. Specific requirements are:

- Games, athletics, cross-country running

Training shoes are acceptable in most circumstances. However, the soles must provide satisfactory grip, particularly in wet conditions. Studded footwear should be worn where appropriate. Participation in 'everyday shoes', such as those with heels or open toes, must not be permitted under any circumstances. Footwear must always be secured by suitable fastenings. Long, loose laces and flapping tongues present a significant hazard.

In football related activities, pupils in boots / blades and those in trainers will involve an assessment of the pupils' footwear to ensure it is suitable part of the on-going risk assessment undertaken by the teacher.

- Indoor activities, (dance, gymnastics, etc.)

Participation with bare feet will enhance the quality of work considerably, thereby making it much safer. If the condition of the floor does not allow bare feet, then soft soled plimsolls provide the best alternative. During activities, such as 'step aerobics', where excessive and repeated impact might be anticipated, suitable training shoes must be worn.

## **Risk Assessment**

Risk assessment is a systematic examination of what within our school can cause harm to people and it helps us determine whether we are doing enough or further actions are required to reduce the likelihood of injury or ill health.

Our policy is to complete a risk assessment of all our known and reasonably foreseeable health and safety hazards covering all our premises, people, equipment and activities in order to control risks and to plan and prioritise the implementation of the identified control measures.

We will ensure that:

- assessments are carried out and records are kept
- control measures introduced as a result of assessments are implemented and followed
- employees are informed of the relevant results and provided with necessary training
- any injuries or incidents lead to a review of relevant assessments
- assessments are regularly monitored and reviewed
- suitable information, instruction and training will be provided to all persons involved in the risk assessment process.

We may be controlling risks in various ways, determining the effectiveness of those controls is part of our risk assessment process.

It is the responsibility of the Headmaster to ensure risk assessments are conducted, although in practice the actual assessment process will be delegated to Heads of Departments and Managers.

Generic/Model risk assessments are acceptable so long as the assessor:

- satisfy themselves that the 'model' risk assessment is appropriate to their work; and
- adapt the model to their own actual work situations.

When completing risk assessments it is necessary to refer to the relevant subject guides:

## **Offsite visits**

Health and Safety of Pupils on Educational Visits. DfE

Outdoor Education Advisers Panel. <http://www.oeap.info/>

## **Safeguarding**

All education professionals, including administrative and facilities staff as well as teaching staff, have a statutory duty of care to all pupils. This duty extends to promoting the welfare of pupils who require additional support but are not suffering harm or at immediate risk of harm.

The school will promote awareness and best practice to deal with situations of suspected abuse or neglect and situations in which staff are best placed to observe such signs. The school has appointed

Liz Ashfield as the designated safeguarding lead, who is responsible for providing support to staff members in their safeguarding duties and for liaising closely with the relevant social services such as children's social care.

### **School Responsibilities**

The school will:

- contribute to inter-agency working for safeguarding and child protection in line with statutory requirements
- implement a suitable safe recruitment process
- implement and enforce a child protection policy and a staff behaviour policy or code of conduct
- provide appropriate training to all staff members
- provide the designated safeguarding lead with appropriate authority, time, funding, resources, training and support to allow them to effectively carry out their duties
- implement a suitable procedure for handling allegations against members of staff
- maintain trust in the teaching profession
- provide a safe environment in which children can learn
- provide training to pupils about safeguarding as part of a balanced curriculum.

### **Staff Responsibilities**

The school requires all staff to:

- assist in providing a safe environment in which children can learn
- raise all concerns with the designated safeguarding lead, including concerns about other staff members
- always err on the side of caution and report suspected cases of abuse or neglect
- report concerns directly to children's social care if it is not possible to raise them with the designated safeguarding lead
- always act in the best interests of the child.

**If at any point there is a risk of immediate serious harm to a child, staff members should make an immediate referral to children's social care. If the child's situation does not improve, staff members with concerns should press for re-consideration.**

## **Recruitment**

The law places requirements on all employers to ensure that all staff engaged to work with children are suitable to do so. We will take all reasonable steps in the employment process including carrying out checks on:

- employment history considering any and all gaps in employment history,
- Qualifications and professional registration, • proof of identity (birth certificate and passport); and
- references.

We will also check current or prospective employees' criminal records and whether they are included on lists of people barred from working with vulnerable groups.

## **Disclosure and Barring Services (DBS) and other checks**

A DBS check will be made for all staff members who will be required to engage in regulated activities prior to employment and the school will carry them out in line with current legislation. Enhanced DBS checks and/or barred list checks will be made for staff members as necessary. Post-employment DBS checks will be carried out for staff members who did not previously take part in regulated activities but who now will be involved in such activities. The school will implement suitable procedures to ensure that staff promoted or moved to such positions will not be permitted to start their new roles until the proper DBS checks are complete.

## **Record Keeping**

We will ensure that appropriate, accurate, legible and contemporaneous records of safeguarding concerns are made and stored securely in accordance with the Data Protection Act.

## **Further Information**

All staff should refer to the ..... for full details of the school's policy and arrangements for safeguarding.

## **Science**

This policy sets out the schools arrangements for ensuring that practical work within the science department is carried out safely and that safety control measures applied are pragmatic and proportionate so as not to inhibit good teaching.

The task of overseeing health and safety within the science department is that of the Head of Department.

### **Information**

All staff are issued with a copy of this policy which they should keep in their personal health and safety portfolio.

Any new instructions, restrictions or rescinded (lifted) restrictions made by the school are communicated to all staff in writing.

### **Monitoring and checking**

The school requires the science department to monitor the implementation of this policy. Records of monitoring are kept by the Head of Department.

### **Training**

Any non-science staff who have to supervise any class in a laboratory will receive brief training in laboratory rules.

Records of the training received by members of the science staff are kept on file.

## **Risk Assessments**

The school follows the recommendation of the Health and Safety Executive to adopt 'model' or 'general' risk assessments adapted to the school curriculum and facilities.

Whenever a new course is adopted or developed, all activities (including preparation and clearing-up work) are to be checked against the model risk assessments and significant findings incorporated into texts in daily use, i.e., the scheme of work, set of lesson plans, syllabus, technician notes.

If a model risk assessment for a particular operation involving hazards cannot be found in these texts, a special risk assessment is to be completed. In order to assess the risks adequately, the following information is collected:

- details of the proposed activity
- the age and ability of the persons likely to do it
- details of the room to be used, i.e. size, availability of services and whether or not the ventilation rate is good or poor
- any substance(s) possibly hazardous to health
- the quantities of substances hazardous to health likely to be used, including the concentrations of any solutions
- class size
- any other relevant details, e.g. high voltages, heavy masses, etc.

Where an activity must be restricted to those with special training, that restriction is included in a note in the text.

## **Equipment Safety**

All staff selecting equipment for purchase will check that it is safe and suitable for the intended purpose (to comply with the Provision and Use of Work Equipment Regulations). Equipment listed by specialist educational equipment suppliers is taken to meet these Regulations but all other equipment, especially gifts, is treated with caution and carefully assessed.

Any user who discovers a hazardous defect in an item of equipment must report it to the Head of Department or other nominated person.

## **Personal Protective Equipment**

The school accepts the duty to provide eye protection, gloves and laboratory coats for employees where the risk assessment requires them and safety spectacles for pupils. The condition of the eye protection is checked at the start of each term.

## **Chemicals**

The safe storage and, where necessary, disposal of chemicals including highly-flammable liquids, will be arranged in accordance with the requirements of the Dangerous Substances and Explosive Atmospheres Regulations (DSEAR) in order to ensure that chemicals are stored securely, the risks of fire, explosion and spillage are minimised, labels are readable and that a spill kit is available and properly replenished.

Hazardous activities involving chemicals is restricted to those who have received special training and as identified in the texts in daily use as part of the risk assessment.

## **Waste disposal**

Waste chemicals and equipment are disposed of in an environmentally-responsible manner in accordance with relevant legislation.

## **Safe disposal of Sharps**

All sharps must be correctly and safely disposed in a leak-proof, puncture resistant, lockable container. The container should not be filled more than two thirds then sealed and disposed as per the school procedure.

## **Security**

Access to laboratories and preparation rooms will be controlled to prevent unauthorised access. All science rooms including store rooms are to be kept locked at all times except when in use. It is the task of the staff member leaving such a room to see that the room is empty and that the door is locked. All laboratories which are left open are cleared of all hazards, including shutting-off all services when supervision by a suitably-trained teacher or teaching assistant comes to an end. No class is allowed to be in a laboratory without adequate supervision.

All science areas are made safe for cleaners or contractors to work in before these persons are allowed to proceed.

## **Fire fighting equipment**

Two 2 kg carbon-dioxide extinguishers and one fire blanket provided for fire fighting are the standard for Science classrooms.

When using flammable metals, it is better to have a bag of sand immediately available in case of fire. Dry powder extinguishers may cause permanent damage to computers and lead to such a mess that industrial cleaning will be required. A fire blanket can be used to smother fires, often causing less damage than a carbon dioxide extinguisher, which may blast apparatus across the bench.

## **Spills**

Trivial spills are dealt with using damp cloths or paper towels. Spills of any amount which do not give rise to significant quantities of toxic or highly-flammable fumes ('minor spills') are dealt with by teachers using a 'spill kit' provided for this purpose.

Major spills are those involving the escape of toxic gases and vapours or of flammable gases and vapours in significant concentrations. (Small amounts can be 'major spills' if spilt in small rooms.) Staff are trained in the appropriate procedures which may involve calling the Fire Service. This training is supported by regular drills arranged by the Head of Department.

## **Smoking**

Exposure to second-hand smoke, also known as passive smoking, increases the risk of lung cancer, heart disease and other illnesses. Ventilation or separating smokers and non-smokers within the same airspace does not stop potentially dangerous exposure.

It is the policy of the school that all of its premises are smoke-free and that all employees and pupils have a right to work in a smoke-free environment.

Smoking is prohibited throughout the entire school, including the use of all artificial smoking aids (electronic or otherwise) with no exceptions. This policy applies to all employees, pupils and visitors in all areas of the school, including school vehicles.

### **Implementation**

All staff are obliged to adhere to and facilitate the implementation of the policy.

The school will ensure that all employees and contractors are aware of the policy on smoking. They will also ensure that all new personnel are given a copy of the policy on recruitment or induction.

Appropriate 'no smoking' signs will be clearly displayed at or near the entrances to the premises. Signs will also be displayed in school vehicles that are covered by the law.

## **Stress**

The Health and Safety Executive define stress as “the adverse reaction people have to excessive pressure or other types of demand placed on them”. This makes an important distinction between pressure, which can be a positive state if managed correctly, and stress which can be detrimental to health.

Stress at work can come about for a variety of reasons. It may be excessive workload, unreasonable expectations, or overly-demanding work colleagues. The school will endeavour to ensure a pleasant working environment and that employees are as free from stress as possible.

We have chosen to adhere to the Management Standards for stress as developed by the Health and Safety Executive. We will:

- work to identify all workplace stressors and conduct risk assessments to eliminate stress or control the risks from stress
- regularly review risk assessments
- consult with employees on issues relating to the prevention of work-related stress
- provide access to confidential counselling for employees affected by stress caused either by work or external factors
- provide training for all managers and line managers in good management practices.

Employees who experience unreasonable stress which they think may be caused by work should raise their concerns with their Manager or through the school’s grievance procedure.

Following action to reduce the risks, they shall be reassessed. If the risks remain unsustainable by the employee concerned, efforts shall be made to reassign that person to other work for which the risks are assessed as tolerable.

## **Supporting Pupils with Medical Needs**

The school’s policy is to support pupils to attend school who have a medical condition. The school will therefore support the administration of short and long term medication and medical techniques where this is necessary for the pupil to continue to be educated at school. The school will also put in place procedures to deal with emergency medical needs.

The school will establish procedures to ensure that all concerned, staff, parents, pupils and, where relevant, health professionals are aware of the pupil’s condition and what steps have been agreed either to manage the condition on a daily basis or to be implemented in case of an emergency.

It is stressed however that the administration of medication is undertaken on a voluntary basis by staff and it will only be done where the procedures are followed.

### **Health Care Plans**

Parents are responsible for providing the school with up to date information regarding their child's health care needs and providing appropriate medication.

Individual health care plans are in place for those pupils with significant medical needs e.g. chronic or ongoing medical conditions such as diabetes, epilepsy, anaphylaxis etc. These plans will be completed at the beginning of the school year / when child enrolls / on diagnosis being communicated to the school and will be reviewed/updated annually.

All staff are made aware of any relevant health care needs and copies of health care plans are available on the schools computer network.

Staff will receive appropriate training related to health conditions of pupils and the administration of medicines by a health professional as appropriate.

### **Administering Medicines**

**The school have a separate policy for the administration of medicines,**

No child under 16 should be given medicines without their parent's written consent. Any member of staff giving medicines to a child should check:

- the child's name
- prescribed dose
- expiry date, and
- written instructions provided by the prescriber on the label or container.

If in doubt about any procedure staff should not administer the medicines but check with the parents or a health professional before taking further action. If staff have any other concerns related to administering medicine to a particular child, the issue should be discussed with the parent, if appropriate, or with a relevant health professional.

### **Self-Management**

It is good practice to support and encourage children, who are able, to take responsibility to manage their own medicines from a relatively early age. As children grow and develop they should be encouraged to participate in decisions about their medicines and to take responsibility.

Older children with a long-term illness should, whenever possible, assume complete responsibility under the supervision of their parent. Children develop at different rates and so the ability to take responsibility for their own medicines varies. This should be borne in mind when making a decision about transferring responsibility to a child. There may be circumstances where it is not appropriate for a child of any age to self-manage. Health professionals need to assess, with parents and children, the appropriate time to make this transition.

Where children have been prescribed controlled drugs, staff need to be aware that these should be kept safely. However children could access them for self-medication if it is agreed that it is appropriate.

### **Refusing Medicines**

If a child refuses to take medicine, staff should not force them to do so, but should note this in the child's record and follow the agreed procedures. Parents should be informed of the refusal on the same day.

## **Educational Visits**

The school will consider what reasonable adjustments they might need to make to enable children with medical needs to participate fully and safely on visits. This might include reviewing and revising the visits policy and procedures so that planning arrangements will include the necessary steps to include children with medical needs. It might also include risk assessments for such children.

Sometimes additional safety measures may need to be taken for outside visits. It may be that an additional line manager, a parent or another volunteer might be needed to accompany a particular child. Arrangements for taking any necessary medicines will also need to be taken into consideration. Staff supervising visits should always be aware of any medical needs and relevant emergency procedures. Copies of health care plans should be taken on visits in the event of the information being needed in an emergency.

## **Sporting Activities**

Any restrictions on a child's ability to participate in PE should be recorded in their individual health care plan. All adults should be aware of issues of privacy and dignity for children with particular needs.

Some children may need to take precautionary measures before or during exercise and may also need to be allowed immediate access to their medicines such as asthma inhalers. Staff supervising sporting activities should consider whether risk assessments are necessary for some children, be aware of relevant medical conditions and any preventative medicine that may need to be taken and emergency procedures.

## School Transport

Where pupils have life threatening conditions, specific health care plans should be carried on vehicles. The care plans should specify the steps to be taken to support the normal care of the pupil as well as the appropriate responses to emergency situations.

All drivers and escorts should have basic first aid training. Additionally trained escorts may be required to support some pupils with complex medical needs. These can be healthcare professionals or escorts trained by them.

Some pupils are at risk of severe allergic reactions. Risks can be minimised by not allowing anyone to eat on vehicles. All escorts should also be trained in the use of an adrenaline pen for emergencies where appropriate.

## Non Prescription Medication

Non prescription medication should not be administered by school. This includes paracetamol and homeopathic medicines.

Staff may not know whether the pupil has taken a previous dose, or whether the medication may react with other medication being taken. **A child under 16 should never be given medicine containing aspirin, unless prescribed by a doctor.** Where it is necessary to administer non-prescription medicine to a child, specific written permission must be obtained from parents / carers and the administration documented.

If a pupil suffers regularly from acute pain, such as migraine, the parents should authorise and supply appropriate painkillers for their child's use, with written instructions about when the child should take the medication. A member of staff should notify the parents that their child has requested medication and supervise the pupil taking the medication if the parents have agreed to it being taken.

## **Swimming Pool**

The school will take all reasonable precautions to safeguard staff and pupils using the swimming pool and recognises that the following are essential to ensuring that this will be achieved:

- completing a Risk Assessment for the pool and making sure it used
- the implementation of a Normal Operating Procedure
- the preparation and training of staff in the Emergency Action Plan
- clear conditions of hire (where relevant)
- the establishment and implementation of pool rules
- determining the special needs or medical conditions of pupils
- nominating a member of staff responsible for pool safety.

### **General Safe Practice**

The minimum number of people, teachers and support, at the poolside is two, where only one is present this will be justified in the risk assessment to indicate why this ratio is acceptable and should highlight alternative emergency arrangements.

A suitably qualified adult should always be present at the poolside to effect a rescue from water and carry out cardiopulmonary resuscitation.

Teachers and school staff present during programmed activities should hold as a minimum either of the following two awards:

- the National Rescue Award for Swimming Teachers and Coaches (NRASTC)
- the STA Level 1 Award in Pool Emergency Procedures.

For unprogrammed activities there should be a qualified lifeguard who should hold:

- the RLSS National Pool Lifeguard qualification or
- the STA Level 2 Award for Pool Lifeguard.

All staff at the poolside need to:

- update their lifesaving and water safety skills regularly
- practice their skills
- remain diligent
- be aware of the NOP and EAP.

## **Pool Rules**

All pupils must be made aware of the school rules, including:

- removing or making safe all jewellery
- not to chew sweets or gum
- usual hygiene procedures
- reporting illness
- no outdoor shoes on the poolside
- no running on the pool surround
- to keep away from the pool edge until instructed
- the emergency procedures for stopping activity and evacuating the pool
- reporting unacceptable behaviour
- responding immediately to all instructions.

## **Teacher to Pupil ratios**

The designated maximum bather capacity appropriate to the size of the pool will be specified in the Normal Operating Procedure.

Irrespective of the ratio there must always be a line manager present on the poolside alongside the swimming teacher, one of which must be responsible for lifesaving. The line managers will be required to be able to effectively carry out emergency procedures. pupil/teacher ratios must not exceed 20:1 and for the vast majority of cases in primary school swimming should be less than this. The following ratios are based upon safety considerations rather than teaching requirements:

### **Non-swimmers and beginners**

A ratio of 12:1 will be used for young children, normally primary school age, who are being introduced to swimming and who are unable to swim 10 metres unaided on back and front.

#### **Children under the age of seven**

Irrespective of their swimming ability, group size should be restricted to a ratio of 12:1.

### **Improving swimmers**

A ratio of 20:1 will be used for swimmers of a similar ability to each other who can swim at least 10 metres competently and unaided on their back and on their front. It is recommended that the lesson be confined to an area in which the children are not out of their depth.

### **Mixed ability groups**

A ratio of 20:1 will be used for pupils with a range of ability (from improving to competent) where the least able and least confident are working well within their depth. Swimmers' techniques, stamina and deepwater experience should be considered.

## **Competent swimmers**

A ratio of 20:1 will be used for those swimmers who can swim at least 25 metres competently and unaided on front and back, and can tread water for 2 minutes.

## **Swimmers with disabilities**

For swimmers with disabilities, each situation must be considered individually as people with disabilities are not a homogeneous group. The school will normally use a maximum 8:1 ratio for swimmers with disabilities and alter the ratio for each group as necessary. Additionally, care must be taken to ensure that there are sufficient helpers in the water to provide a 1:1 ratio for those needing constant support and a sufficient number of other helpers to provide the degree of support required by the range of disabilities within the group.

## **Normal Operating Procedure (NOP)**

The NOP should include:

- a plan of the pool
- the key hazards
- communications methods
- rules of supervision
- systems of work and operational systems
- detailed work instructions
- first aid supplies and training
- details of alarm systems and other emergency equipment:
- conditions of hire, where appropriate.

## Emergency Action Plans

An Emergency Action Plan (EAP) details what everyone should do in the event of a reasonably foreseeable emergency. This might include:

- overcrowding
- disorderly behaviour
- assault
- lack of water clarity
- fire
- bomb threat
- structural failure
- emission of toxic gases
- serious injury to swimmer
- discovery of a casualty in the pool.

The procedure will explain how to clear the pool and/or evacuate the building/site, the roles of all the staff involved, how to call for help and what help to give to the people involved.

All staff likely to be involved in this procedure and all outside user group leaders who may be affected need to be trained to ensure their effectiveness in an emergency.

Notices need to be displayed to advise pool users of the arrangements in the event of an emergency.

All school classes to run practice drills during the first lessons of each term in order that both staff and pupils recognise the alarm signal and know how to respond to it.

Exit doors and signs, fire fighting equipment and alarm points need to be checked regularly to ensure that they are working and accessible. All fire doors must be operable without the aid of a key at all times the pool is in use. These should be checked at the start of every day.

## Safety Equipment

- All pools must be equipped with a means of raising an alarm and summoning support in the event of an accident or incident. Ideally, this will be an emergency button which activates a siren or a telephone giving direct contact with the emergency services.
- There should be a long pole at either side of the pool to reach and rescue anyone in difficulties without getting into the water. Adequate buoyancy aids and first aid equipment, including a blanket should be immediately to hand.
- Pool depths should be clearly marked on the walls of the pool and teachers should explain their significance to pupils, especially beginners.
- In school open-air pools this could be a painted depth line on the fence so that children can stand next to it to see where the water will come up to when they get in.
- All signs should be compliant with the Safety Signs and Signals Regulations.
- A pool divider, usually a rope, should normally be positioned to separate deep from shallow water when non-swimmers are present.
- All pools should be able to be locked off and isolated to prevent unauthorised access when not manned. Failure to achieve this is a major cause of accidents in school and private pools.

## Conditions of Hire

If the school pool is hired to an outside organisation the school will ensure that the outside organisation will use the pool in a safe manner.

Hirers will be required to sign a hire agreement and will also be given an up to date copy of the NOP and EAP and any special conditions of hire which might apply to their session.

Conditions of hire should include:

- the name and address of the organisation hiring the pool
- the name of the pool being hired
- the name of the hirer and contact details
- the activity for which the pool is to be hired (to assess the level of risk and safety rules required by session type)
- the numbers participating and their age and swimming ability (where a school hires a pool for a block involving more than one class with different abilities, ideally the form should be completed to show all this information as the equipment/area of the pool used may need to be different for different groups)
- specific agreement on the respective responsibilities of the hirer and the pool operator (for instance who will provide the lifeguarding and the level of life guarding provision to be made, child protection issues, staffing levels)
- details of who is to be responsible for what in the event of an emergency (normally it is the operator of the pool who is responsible for building related problems and the hirer for emergencies associated with the activities of the group)
- any safety advice to be given to swimmers and any specific rules that should be enforced
- a signature from the hirer that they have received and read copies of the NOP & EAP
- appropriate third party liability insurance.

## **Temporary Staff and Volunteers**

The school will take the necessary measures to ensure the health and safety of any staff members employed on a temporary or voluntary basis.

To achieve this, the school will provide temporary or voluntary staff with the following information prior to starting work:

- details of the qualifications and skills are required to do the work safely
- the requirements of the safeguarding policy
- any risks to health and safety identified by workplace risk assessments
- the preventive measures to be taken
- safe working procedures
- the action to be taken in the event of an emergency.

The competence of temporary or voluntary staff will be assessed to ensure they are capable of working safely.

Trainee teaching staff or student teachers will additionally be required to complete the proper DBS checks before they are permitted to start work.

## Training

Training in health and safety is a legal requirement and also helps create competent staff at all levels within the school to enable them make a far more effective contribution to health and safety, whether as individuals, teams or groups.

Competence of individuals through training helps individuals acquire the necessary skills, knowledge and attitude which will be promoted by managers throughout the school.

Our training objectives will cover three areas, that of the organisation, the job and individuals.

All staff will need to know about:

- the health and safety policy
- the structure and system for delivering this policy.

Staff will need to know which parts of the system are relevant to them, to understand the major risks in our activities and how they are controlled. All employees will be provided with the company Health and Safety Handbook.

Managers training needs will include:

- leadership and communication skills
- safety management techniques
- skills on training and instruction
- risk assessment
- health and safety legislation
- knowledge of our planning, measuring, review and audit arrangements.

All our staff training needs will include:

- relevant health and safety hazards and risk
- the health and safety arrangements relevant to them
- communication lines to enable problem solving.

All staff will also receive **induction training**. Such training will cover:

- fire procedures including warning systems, actions to be taken on receiving warning, locations of exits/escape routes, evacuation and assembly procedures,

- first aid/injury procedures including reporting and the names of first aiders/appointed persons,
- instruction on any prohibition areas (i.e. no smoking),
- issue of protective clothing/equipment and its use,
- instruction under COSHH,
- mandatory protection areas,
- thorough instruction applicable to their particular duties at work.

Training needs will be reviewed as a result of job changes, promotion, new activities or new technology, following an accident/incident and performance appraisal.

Records of training will be kept for all employees.

Employees must:

- participate in the induction training activities they have been required to attend or carry out
- work according to the contents of any training they receive
- ask for clarification of any points they do not fully understand
- not operate hazardous plant or equipment, use hazardous chemicals or carry out any hazardous activity unless they have been appropriately trained and instructed.

## **Violence to Staff**

The school recognises that in certain situations violent behaviour towards staff may occur and therefore will take all reasonable measures to protect staff from violence and aggression.

We define violence and aggression as:

- actual or threatened physical assaults on staff
- psychological abuse of staff
- verbal abuse which includes shouting, swearing and gestures
- threats against employees.

To achieve this objective we will:

- carry out risk assessments of potential conflict situations to determine the control measures necessary to protect staff
- ensure that premises are kept secure
- inform all employees of the procedure following a violent or challenging behaviour incident
- not tolerate violence or challenging behaviour towards our employees
- train our employees who may be exposed to violence or challenging behaviour situations
- support the employees involved in any incident
- support their decisions regarding the pressing of criminal charges
- provide any counselling or post-incident assistance required by the employees
- keep records of all incidents of violence and aggression and review the control measures with a view to continual improvement in employee safety.

## **Visitors**

In the interest of safety and security, the school will take the necessary measures to protect staff and visitors from any accidents or incidents that may occur during visiting.

Employees hosting visitors must ensure that:

- they are authorised to enter the premises or accompanied
- they adhere to applicable health and safety instructions and rules during their visit
- adequate information is passed to ensure their safety including emergency information
- any protective clothing required is provided and worn
- any accidents / incidents involving visitors are reported through the accident reporting arrangements.

Employees aware of people on the premises who may be unauthorised should report these to their manager for action.

## **Emergency Action**

In the event of the fire alarm sounding, all visitors should be escorted to the assembly point by their host. Visitors should not leave the area before notifying the senior person present.

## **Window Restrictors**

The fitting and use of window restrictors within school premises is used to ensure the safety and security of members of staff, pupils and visitors. The school is particularly concerned with preventing persons from falling from height, and has fitted window restrictors to remove the possibility of persons opening a gap large enough for a person to fall through. It is therefore essential that all window restrictors are maintained in a good working order and that all staff report defects to their line manager as a matter of urgency.

The school will:

- risk assess the danger of falling from any window and the effects of installing a window restrictor, including the possible loss of ventilation
- identify all vulnerable parties who may be particularly at risk from falling out of windows
- ensure that all window restrictors are secured with tamper-proof fittings
- ensure that the window frames are sufficiently robust where the window requires a window restrictor
- ensure that all window restrictors are properly maintained and kept in working order
- provide adequate training and supervision to all staff who use or maintain window restrictors

The Bursar is responsible for checking the window restrictors on a monthly basis. Any window restrictor that is found to be broken will be replaced or repaired as a matter of urgency, but the window must be kept locked shut until repairs are carried out. If the repair will not take place for more than a day, temporary signage will also be put in place to indicate that the window should not be used.

## **Work at Height**

The school will take all reasonable steps to provide a safe working environment for all employees who may be affected by work at height activities.

The school will ensure that:

- all work activities that involve work at height are identified and assessed
- the need to undertake work at height will be eliminated whenever it is reasonably practicable to do so
- all work at height is properly planned and organised
- all employees required to use stepladders or ladders are competent
- regular inspections of all stepladders and ladders are undertaken
- any contractors on school property comply with this policy
- ladders and stepladders are secured to prevent unauthorised use.

### **Risk Assessment for Work at Height**

For all activities involving work at height a risk assessment must be conducted and the findings recorded. This assessment should consider both the work to be done and the most appropriate access equipment to be used (not just what is available) to achieve a safe system of work.

When determining control measures the following hierarchy of controls for work at height as follows must be considered:

- avoid the risk by not working at height, for example by working from existing platforms, using long reach equipment etc. If it is not practicable to do the work safely in some other way then:
- use work equipment or other measures to prevent falls; and
- where the risk of a fall cannot be eliminated further controls to minimise the distance and consequences of a fall should one occur.

The detail of the assessment will depend on the level of risk involved, as a general guide the risk assessment should consider:

- the task and activity involved
- the people (medical conditions etc.)
- equipment to be used including erection and dismantling
- the location ( proximity to roads, overhead electrical cables etc)

- the environment, poor conditions and slippery surfaces (weather, temperature etc.)
- the affect on pedestrians, falling objects.

### **Using Ladders (including stepladders)**

Ladders should not be used simply because they are readily available, the risk assessment should determine if a ladder or stepladder is appropriate for the task.

Ladders and stepladders should only be used for short duration tasks (less than 30 minutes), light duty tasks or where more suitable access equipment cannot be used due to existing features of the site which cannot be altered.

For example whilst a ladder may reach the area of work, if the task requires strenuous work, carrying bulky / heavy equipment or is likely to take more than 30 minutes then an alternative means of access such as a tower scaffold or podium steps would be more appropriate.

Only those persons who have been trained to use ladders safely may use them.

All ladders should be secured against unauthorised use.

Prior to use it should always be ensured that the ladder is in good condition and fit for purpose.

Where ladders are to be used to work from it should be ensured that:

- a secure handhold and support are available at all times
- the work can be completed without stretching
- the ladder can be secured to prevent slipping.

### **Equipment identification / inspection**

The school will compile a register of equipment (excluding kick stools). Where there is more than one piece of equipment each should be indelibly marked with an identifying number.

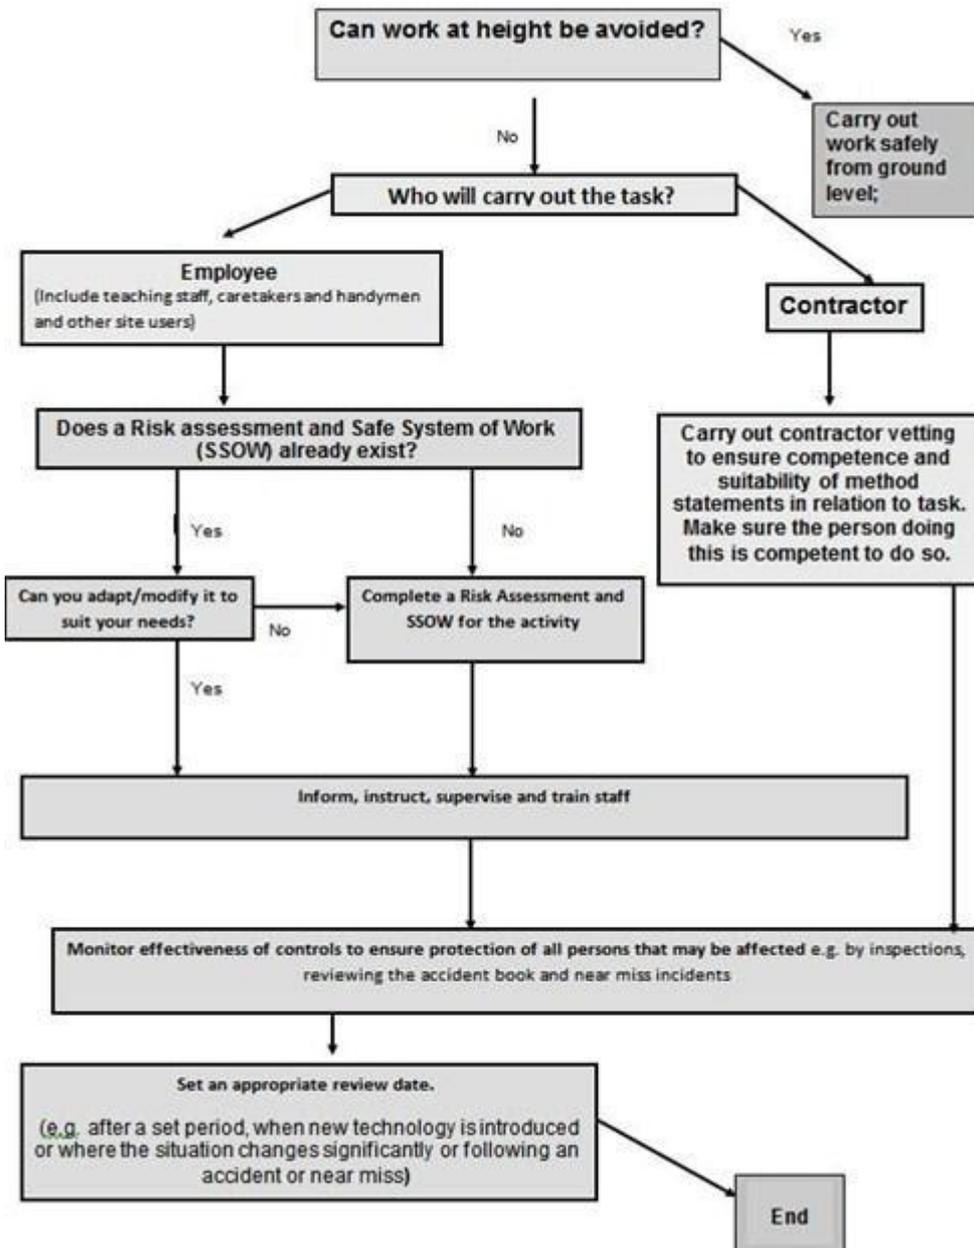

Equipment for work at height, should be inspected prior to use and by a competent person termly/6 monthly. The inspection will depend upon the complexity of the equipment.

In the case of tower scaffolds a competent person must inspect these prior to its first use and thereafter every 7 days that it remains in place.

## TYPICAL SCHOOL AREAS REQUIRING WORK AT HEIGHT

- Putting up displays
- Placing / retrieving items stored above head height
- Opening and closing windows
- Stage support work during drama activities
- Moving and erecting PE equipment
- Cleaning
- General site management / caretaking activities
- Maintenance and repairs
- Construction work / projects

## SCHOOLS WORK AT HEIGHT FLOWCHART

## **Work Equipment**

The school will provide a safe working environment in relation to work equipment safety and ensure all employees receive appropriate safety information and training in their work equipment.

To achieve this objective the school will:

- provide work equipment that is suitable for the purpose and compliant with the requirements of the Provision and Use of Work Equipment Regulations
- retain and make available the manufacturer's instruction manual for each item of equipment, where relevant
- before using any item of work equipment, ensure that a risk assessment is carried out and brought to the attention of relevant employees
- inspect all equipment at installation and prior to first use
- regularly inspect work equipment in accordance with the manufacturer's recommendations
- maintain work equipment in accordance with the manufacturer's recommendations
- keep records of all inspections and maintenance
- provide adequate instruction, information and training to employees to enable the work equipment to be used and maintained safely
- provide refresher training as appropriate and as determined necessary by workplace inspections.

# **RISK ASSESSMENT**

## 8. RISK ASSESSMENT

### Risk Assessment

**Risk Assessment** involves identifying the hazards present in the work place or arising out of any work activity and evaluating the extent of the risks involved to employees and others, taking into account existing precautions and their effectiveness.

A **hazard** is something with a potential to cause harm and can include articles, substances, plant or machines, methods of work and the work environment.

**Risk** is the likelihood of harm from *that hazard being realised*. *Risk increases with the number of people exposed to the hazard and also with the potential severity of the harm i.e. the resultant injury or ill health effect. If there are no hazards there are no risks.*

The regulations require that risk assessments are '**suitable and sufficient**' in that they should identify all the significant hazards present within the business and its activities and that they should be proportionate to the risk. The assessment should cover all risks that are reasonably foreseeable.

The risk assessment must identify all those people who may be affected by the hazard, whether they are workers or others, such as members of the public.

We may be controlling risks in various ways, determining the effectiveness of those controls is part of the risk assessment process.

Health and safety law does not demand absolute safety when considering what safety controls are required but measures taken should go as far as is '**reasonably practicable**'; a balance between risk and costs, the greater the risk the greater the need to commit resources in terms of time and money to remove or control the risk.

It is a legal requirement that the significant findings of our risk assessments are brought to the attention of our employees.

## Carrying out risk assessments

Those who are involved in risk assessments should:

- be competent
- have knowledge and experience of working procedures in practice, potential dangers and strengths and weaknesses of existing precautions
- have knowledge and experience of how to solve problems identified by the assessment
- be in a position to give the commitment, co-operation and resources required to implement the assessment results.

It is important that the person carrying out the risk assessment is competent. This means that the person must have the necessary skills and knowledge gained through experience and training and may have qualifications that enable them to make sound judgments.

### The five stages of risk assessment

#### STEP 1 - IDENTIFY THE HAZARDS

Look for hazards by walking around the workplace. List the hazards that could reasonably be expected to cause harm. Ask for the opinion of employees as they may have noticed things that are not immediately obvious.

Examples of hazards include:

- cables trailing over floors
- fire
- chemicals
- work benches which are too high or too low
- electricity
- loads which have to be moved manually
- work equipment
- working environment e.g. ventilation, lighting, heating.

#### STEP 2 - IDENTIFY WHO MAY BE HARMED AND HOW

List groups of people and individuals who may be affected by the hazards e.g.:

- staff
- members of the public • contractors on the premises.

Pay particular attention to vulnerable persons, e.g. those with disabilities, visitors, female employees who are pregnant or who have recently returned to work after having a baby, inexperienced employees or young persons.

### **STEP 3 - EVALUATE AND CONTROL THE RISK**

Evaluate the risks arising from the hazards and decide whether existing precautions are adequate or if more should be done. When evaluating the extent of the risk, account should be taken of the chance of some harm occurring (likelihood), the likely severity of this, and the number of people who could be affected. The formula:

Severity x Likelihood = Risk

Is used on the risk forms within this policy manual

Even after all precautions have been taken some risk may remain. Ensure the precautions in place meet standards set by legal requirements comply with a recognised standard, represent good practice and reduce the risk as far as is reasonably practicable.

Where additional controls or further action are necessary to reduce the risk, decide what more could reasonably be done by adopting the following principles:

- avoid the risk completely
  - evaluate risks which cannot be avoided
  - combat risks at source
  - adapt work to the individual
  - make use of technical progress
- 
- replace the dangerous with none or less dangerous
  - develop an overall prevention policy
  - give priority to measures which protect the greatest number of people
  - give appropriate instructions to employees.

### **IMPLEMENTING AN ACTION PLAN**

Once the level of risk has been determined and the control measures needed to reduce or eliminate the risk established, an action plan should be drawn up with timescales for implementation of the control measures.

### **STEP 4 - RECORD YOUR FINDINGS**

The significant findings of the assessment must be recorded since these provide evidence that something has been done, it is also a legal requirement. Keep any written assessments for future reference and ensure that employees are informed of the findings and control measures, either existing or additional, that have to be observed and used. In some circumstances the findings of the risk assessment should also be given to others who could be affected, for example agency workers, contractors etc.

## Hazards and example controls

Hazard	Example control measures
Manual handling	Mechanical aids, hoists, getting assistance, breaking loads into smaller units, training
Hazardous substances	Substitution for less hazardous alternatives, extract ventilation, personal protective equipment, training
Work equipment (machinery, tools, etc.)	Guarding, demarcation of danger zones, restricted operation and use planned preventative maintenance, training
Ladders	Avoid working at height. correct type of ladder/stepladders, maintained, training
Electricity	Insulated tools, residual circuit breakers, fuses, earthing, inspection and testing of systems and appliances
Stairs, etc	Good lighting, handrails, non-slip surfaces, slightly raised/highlighted front edges
Fire	Detection/warning systems, fire drills, extinguishers, signs, suitable storage facilities for substances and goods, fire retardant furniture and fittings
Noise	Reduction at source, isolation, ear protection, demarcation of danger zones
Stress	Reduce/increase workload, more control over work, work suitable for the individual, avoidance of monotonous repetitive work
Work environment	Good lighting, ventilation, redesign layout of area, heaters/coolers

### STEP 5 - MONITOR AND REVIEW THE ASSESSMENT

It is important that the control measures are monitored and that records are kept. A regular review of the assessments should be made to take into account any changes to the methods or systems of work. You should also review the assessment following an accident, where there has been a significant change to the work, if new information comes to light, or if there is any other reason to believe that it may no longer be valid. Following the review, additional control measures should be implemented if required. Even if there are no significant changes since the original risk assessment, it should be regularly reviewed to confirm that it is still relevant and valid.

## **Fire Risk Assessment**

A fire risk assessment is an organised and methodical look at the premises, the activities carried on there and the likelihood that a fire could start and cause harm to those in and around the premises.

The aims of the fire risk assessment are:

- to identify the fire hazards
- to reduce the risk of those hazards causing harm to as low as reasonably practicable
- to decide what physical fire precautions and management arrangements are
- necessary to ensure the safety of people in your premises if a fire does start.

The significant findings of the fire risk assessment, the actions to be taken as a result of the assessment and details of anyone especially at risk must be recorded.

It is important that the fire risk assessment is carried out in a practical and systematic way and that enough time is allocated to do a proper job. It must take the whole of your premises into account, including outdoor locations and any rooms and areas that are rarely used. Small premises are assessed as whole, larger premises are divided into rooms or a series of assessment areas using natural boundaries, e.g. process areas, offices, stores, as well as corridors, stairways and external routes.

Risk assessments must take account of other users of the buildings and co-operation and communication of hazard and risk must be shared between businesses to ensure a co-ordinated response is prepared and implemented.

One or more competent persons are appointed to carry out any of the preventive and protective measures needed to comply with the legislation. The competent persons are an appropriately trained, employee or, where appropriate, a third party consultant.

The fire risk assessment should demonstrate that, as far as is reasonable, the needs of all relevant persons, including disabled people, have been considered.

## **Six Steps to Fire Risk Assessment**

### **1. Identify the hazards**

- Sources of ignition
- Sources of fuel
- Sources of oxygen.

### **2. Identify people at risk**

- Employees
- People in and around the premises
- Vulnerable persons, disabled etc.

### **3. Evaluate, remove, reduce and protect from risk**

- Evaluate the risk of fire occurring
- Evaluate the risk to people from fire
- Remove or reduce the fire hazards
- Remove or reduce the risks to people.

### **4. Consider:**

- Detection and warning
- Fire fighting
- Escape routes and travel distances
- Lighting • Signs and notices
- Maintenance.

### **5. Record, plan, inform, instruct and train**

- Record the significant findings and action taken
- Prepare an emergency plan
- Inform and instruct relevant people; co-operate and co-ordinate with other businesses
- Provide training.

### **6. Review**

- Keep assessment under review
- Revise where necessary.

# **MONITORING HEALTH AND SAFETY**

## 9. MONITORING OF HEALTH AND SAFETY

Measurement is essential to maintain and improve our health and safety performance to identify how effectively we are controlling risks and how well we are developing a positive health and safety culture.

There are two types of performance monitoring, active and reactive.

### **Proactive monitoring**

Monitoring is a line manager's responsibility and in this section there are monitoring checklists for each of the key management positions to be used to determine achievement against relevant health and safety standards. In completing the checklist managers are providing evidence that they have carried out monitoring within their areas of responsibility and they are reinforcing their commitment to health and safety objectives in general and helping to develop a health and safety culture.

This approach to proactive monitoring gives the school feedback on its performance before an accident, incident or case of ill health.

Managers and line managers with defined health and safety responsibilities must monitor in detail the areas for which they have day to day control. Much of this checking will be informal and not recorded but formalised, structured checks are also essential to ensure all areas are covered and to demonstrate compliance to senior managers who must in turn seek assurance that first line monitoring is taking place.

Employees who take a proactive interest or represent groups for health and safety can also be involved with monitoring and may take the format of a health and safety tour or if more formally via a devised checklist.

### **Reactive monitoring**

Reactive monitoring of events including accidents, incidents, cases of ill health or property damage provide an opportunity to check performance and learn from mistakes and improve control measures.

Trends and common features arising from accident and incident investigation can identify jobs or activities where future health and safety initiatives would be most beneficial. Investigations may also provide valuable information in the event of legal action or an employee claim.

### **Governing Body**

**To be completed:** Termly

**Date:**

Subject	Yes	No	Comment
<b>Health and Safety Management</b>			
Has a report on the last 12 months health and safety performance been prepared?			
Has a Health and Safety Plan for the next 12 months been prepared?			
Are there adequate resources to implement the Health and Safety Plan?			
Are we on target with our Action Plan?			
<b>Health and Safety Performance</b>			
How many accidents/incidents have occurred across the school within the last 12 months?			
How many RIDDOR reportable events have occurred in the last 12 months?			
Is there any outstanding enforcement action?			
Have policies and procedures been revised and implemented to prevent a recurrence of any serious incidents/enforcement action?			
How many employee claims have been made in the last 12 months?			
How many outstanding employee claims are there?			

### **Bursar**

**To be completed: Monthly**

**Date:**

Subject	Yes	No	Comment
<b>Health and Safety Management</b>			
Is the Health and Safety Policy current and up to date?			
Does the management structure within the Policy reflect the current organisation?			

Are arrangements in place to ensure health and safety training is provided throughout the school?			
Is health and safety training up to date?			
Is all health and safety training being recorded?			
Is there a Health and Safety Plan in place?			
Are there any overdue actions from the Health and Safety Plan?			
Are delegated persons completing their Health and Safety Monitoring activities at the agreed timescales?			
<b>Health and Safety Performance</b>			
Have annual accident /incident statistics been compiled? Is the trend positive or negative?			
Do the accident/incident statistics indicate where future health and safety initiatives should be directed?			
Are all accident investigations complete?			
Are any outstanding actions required following accident investigations to prevent a reoccurrence?			
<b>Communication and Consultation</b>			
Has Health and Safety been discussed at meetings at least twice within the last 12 months?			
Are Health and Safety Committee Meeting minutes circulated?			
Are there any outstanding actions?			
<b>Risk assessments</b>			
Are risk assessments completed across all departments, where necessary?			
Are risk assessments brought to the attention of the relevant staff?			

<b>Contractors and Maintenance</b>			
Are procedures in place to check the health and safety credentials of all contractors and to ensure they have adequate insurance?			
Are internal health and safety checks completed of the work carried out by contractors?			
<b>Fire and Emergencies (Fire, Gas, Water, Catastrophe)</b>			

Are emergency plans in place?			
Have all staff been made aware of the emergency plans?			
Have emergency drills been practised to test their effectiveness?			
<b>Accident / First Aid</b>			
Is there adequate first aid provision throughout all areas?			
Are the arrangements for recording accidents and incidents capturing all the necessary information?			
Are arrangements in place for ensuring that all RIDDOR events are notified to the HSE?			
Is the accident/incident investigation procedure effective in improving standards of safety?			
<b>Fire</b>			
Has the fire risk assessment been reviewed within the last 12 months?			
Have all the actions from the fire risk assessment been completed?			
Has the fire alarm and emergency lighting system been serviced in the last 12 months?			
Has the sprinkler system been serviced in the last 12 months?			
Are all fire checks being completed and recorded?			
<b>Electricity</b>			
Is the fixed electrical testing up to date for each site?			
Is the portable appliance testing schedule being maintained?			
Are all electrical test records kept up to date?			
<b>Gas Safety</b>			
Are gas appliances inspected and tested at prescribed intervals?			
Are records kept?			
<b>School Environment</b>			
Are conditions comfortable for staff and pupils: adequate heating, lighting and ventilation?			

<b>Work Equipment</b>			
Has all plant and equipment been serviced in accordance with service agreements?			
Are plant and equipment service records up to date?			
<b>Asbestos</b>			
Has an asbestos survey been conducted at all sites?			
Is there a management plan in place for the control of asbestos at all sites?			
Is the asbestos management plan at all sites up to date?			
Is asbestos awareness training in place for relevant staff?			
<b>Legionella Control</b>			
Are there arrangements in place for the control and management of legionella bacteria in water systems at all sites?			
Are control checks being carried out and recorded?			
<b>Lifts</b>			
Are all lift maintenance contracts in place?			
Are all lifts examined in line with the legal requirement under LOLER?			
Are all servicing and lift examination reports kept readily available for examination?			

## 10. LEGAL EXPENSES INSURANCE

For a copy of Ellis Whittam's master legal expenses insurance policy please see <http://www.elliswhittam.com/health-safety/legal-expenses-insurance/>. Please refer to your contract with Ellis Whittam for the type of cover (if any) that is applicable to your organisation – i.e. employment dispute insurance or health & safety prosecution insurance or both – and the relevant provisions of the master policy document will then apply accordingly.

Please contact us if you require a hard copy of the policy.
